Deep Dive: Mining News Roundup

Australia’s Iron-Ore Glory Days Are Slipping

Pilbara’s powerhouse slows as prices fall, grades drop, and competition rises

August 1, 2025

40% projected price drop by 2027

Rio Tinto’s Western Range mine in Western Australia is replacing output, not expanding it. Canberra forecasts iron-ore prices to drop 40% to $74/t by 2027. With ore quality declining and competition from West Africa’s high-grade Simandou project, Australia’s mining dividend is at risk. Without a strong successor commodity, the boom that fueled decades of prosperity may be nearing its end.

Note: Locations show major iron ore operations

Moody’s Warns on SQM as Lithium Prices Plunge

Debt climbs and earnings tumble amid 90% market drop

August 1, 2025

90% drop in lithium prices

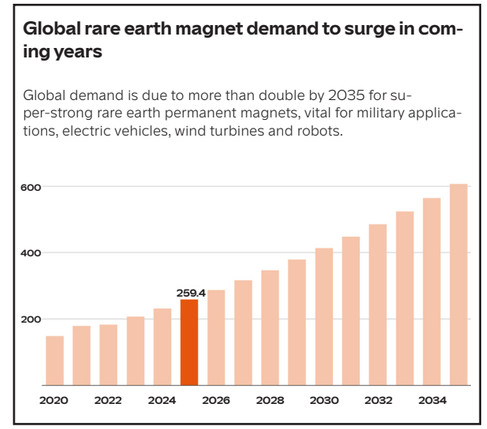
Chile’s SQM retains its credit rating but faces a negative outlook from Moody’s. Lithium prices have fallen 90% since 2022, debt has surged from $2.9 B to $4.7 B, and earnings have halved. Layoffs and reliance on debt financing raise concerns over long-term stability.

Trump Pushes Price Floor for US Rare Earths

New plan aims to break China’s decades-long dominance

August 1, 2025

> ***Our goal is to build out our supply chains from mines to end use products." — Peter Navarro***



Trump administration officials are considering pandemic-style measures to guarantee prices for US-produced rare earths. The goal: rival China’s market control. A July 24 meeting with mining firms and tech companies discussed mining, processing, and recycling expansion. The move follows a Pentagon-backed deal with MP Materials and comes as China restricts exports.

BHP, Vale in $1.7 Billion Legal Showdown

UK law firm accuses mining giants of fee “cheating” in Brazil disaster case

August 1, 2025

$1.7 B in alleged unpaid fees

Pogust Goodhead alleges BHP and Vale undercut legal fees in settlements tied to the 2015 Fundao dam collapse in Brazil. The firm seeks £1.3 B ($1.7 B) in fees plus $1 B in financing costs. The miners deny wrongdoing, citing a $30.3 B Brazil compensation deal. The disaster killed 19 and caused widespread environmental damage.

Arizona Lithium Inks Rail Deal to Boost Prairie Project's Global Reach

MoU with Long Creek Rail secures key export route for Saskatchewan lithium

August 4, 2025

150 t/y initial lithium carbonate output

ASX-listed Arizona Lithium has signed a non-binding memorandum of understanding (MoU) with Long Creek Rail to build a dedicated transload facility for its Prairie lithium project in Saskatchewan, Canada. The facility will sit along Long Creek's 41-mile corridor, linking directly to the Canadian Pacific Railway at Estevan, opening access to North American and global markets.

Managing Director Paul Lloyd called the deal "a key milestone in de-risking the scale-up of the Prairie project," citing reduced trucking needs and stronger regional logistics. Arizona Lithium will lead site selection, design, and construction, while Long Creek will provide rail access and integration into its network.

The MoU also allows for the potential co-location of a battery-grade lithium refinery, enhancing inbound reagent deliveries and outbound refined product shipments.

This agreement follows Saskatchewan's approval of Phase 1 production at Prairie, starting at Pad #1 with a commercial-scale direct lithium extraction (DLE) unit producing an initial 150 t/y of lithium carbonate equivalent. Located in the Williston Basin, the project benefits from existing infrastructure and aligns with sustainability goals by reducing land and freshwater use.

> ***"This agreement represents a key milestone in de-risking the scale-up of the Prairie project." — Paul Lloyd***

MinRes, Dynamic Revise Widgiemooltha Lithium JV Terms

Stage 2 earn-in extended, expenditure reduced amid sector headwinds

August 4, 2025

A$14 million Stage 2 spend over six years

Mineral Resources (MinRes) and Dynamic Metals have amended their lithium JV at the Widgiemooltha project in Western Australia, extending the Stage 2 earn-in from four to six years and lowering the commitment from A$15 million to A$14 million. Sixteen tenements have been returned to Dynamic, narrowing the JV's focus to the most prospective lithium zones.

Dynamic MD Karen Wellman praised the collaborative approach, acknowledging market challenges. MinRes retains 40% lithium rights after completing Stage 1 with a final A$1 million payment, while Dynamic will also explore gold opportunities outside the JV portfolio.

Gold's Rally Sparks Warning from Evolution's Conway

Record price surge calls for capital discipline in mining sector

August 4, 2025

$1000 gold price gain in four months

> ***"Margin over ounces — that's our underlying focus." — Lawrie Conway***

Gold's $1,000 surge in four months boosts miners' margins, but Evolution Mining CEO Conway warns at Diggers & Dealers to avoid past errors, urging disciplined capital use to safeguard cash when cycles reverse. Evolution pursues gold-copper diversification for stability, with copper assets Ernest Henry and Northparkes providing 30% revenue and energy transition exposure; A$880m Cowal cash flow and extended mine life to 2042 strengthen portfolio performance.

Vale Still Undecided on Brazil's Bamin Iron-Ore Project

High infrastructure costs keep investment on hold

August 4, 2025

R$30 billion infrastructure investment required

> ***"We still haven't been able to come up with an equation that makes this calculation work." — Marcelo Bacci***

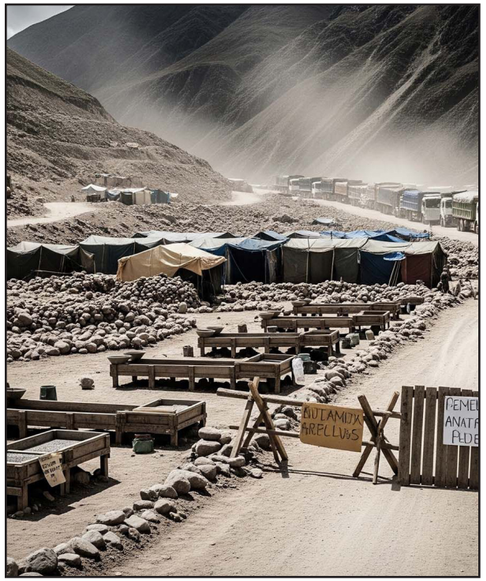
Vale CFO Marcelo Bacci says no viable equation yet exists to justify the estimated R$30 billion ($5.4 billion) needed for Eurasian Resources Group's Bahia Mineração (Bamin) project in Brazil. Full operation could produce 26 Mt/y of iron ore, but profitability hinges on securing multi-commodity transport and attracting partners.

Peruvian Informal Miners Suspend Talks with Government

Dispute over explosives storage deadline reignites protest threat

August 4, 2025

20,000 miners at risk of exclusion



"Stricter regulations will leave thousands without work." — Maximo Franco Bequer

Informal miners in Peru have halted negotiations with the government and may resume protests after failing to secure an extension on the August 17 deadline to move explosives into formal storage facilities. CONFEMIN union leader Maximo Franco Bequer said roughly 20,000 miners risk exclusion from the formalization program if they cannot comply. The miners, based in the Cusco region, had paused a two-week protest in July that blocked a major copper transport route used by MMG, Glencore, and Hudbay. They argue that current formalization requirements are too burdensome and could cost them their livelihoods.

Digi Power X Posts 122% Cash & Crypto Jump in July

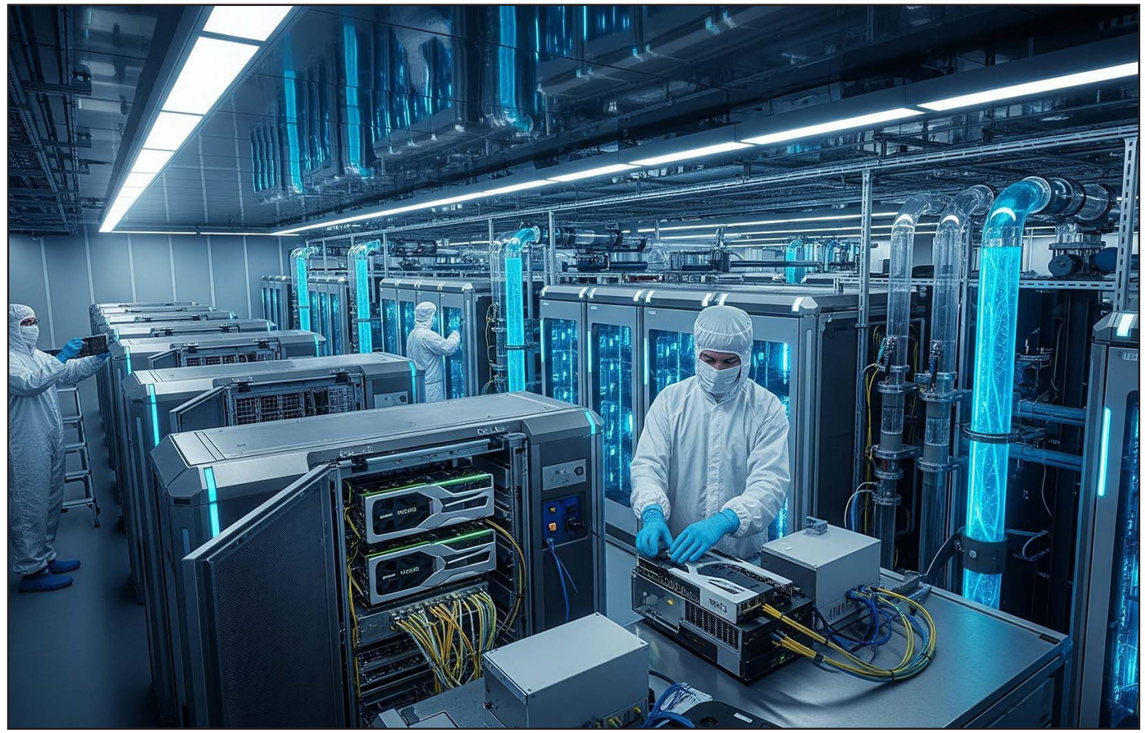
AI-ready data center expansion and BTC mining boost revenue streams

August 4, 2025

122% increase in cash & crypto holdings in one month

Digi Power X Inc. reported a 122% month-over-month increase in its combined cash and crypto position to $30 million, driven by BTC mining, ETH purchases, and energy sales. The company mined 23 BTC in July, expanded holdings to 61 BTC, and acquired 516.64 ETH.

Its ARMS 200 AI platform — designed for high-density GPU workloads — will debut at the Alabama site with Supermicro NVIDIA B200 systems. Parallel BTC mining growth will come from hydro-powered systems launching in Q1 2026. Digi Power X currently operates with 100MW capacity, aiming for 200MW+ through acquisitions and upgrades.



"We're scaling AI infrastructure and sustainable mining in tandem." — Michel Amar

Santos to Supply Narrabri Gas to ENGIE

Domestic focus reinforced ahead of final investment decision

August 4, 2025

20 PJ/year domestic gas supply

Oil and gas producer Santos has signed a deal to supply up to 20 PJ/year from its Narrabri project in NSW to utility firm ENGIE, with the entire output committed to the Australian domestic market.

The A$3.6 billion project, approved earlier this year, is aimed at easing east coast energy shortages. A final investment decision is expected by year-end, with pricing and start dates still under negotiation.

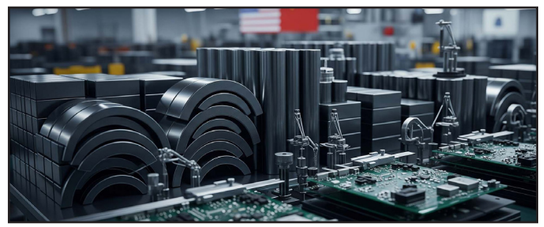
"Narrabri will deliver reliable domestic energy supply." — Santos spokesperson

US-China Talks ‘Halfway There’ on Rare Earth Flows

Tariff truce extension sees magnet shipments rise after export controls

August 4, 2025

353 t rare earth magnets shipped in June



US Trade Representative Jamieson Greer reported progress in rare earth negotiations with China, saying the sides are “about halfway there” following talks in Stockholm. Beijing has agreed to speed shipments of rare earth magnets after Washington paused tariff hikes.

China’s exports rose to 353 t in June, up from 46 t in May, but remain below pre-control levels. The discussions are part of broader US-China trade stabilization, though tensions over AI chip exports remain.

"We’re focused on restoring the free flow of magnets." — Jamieson Greer

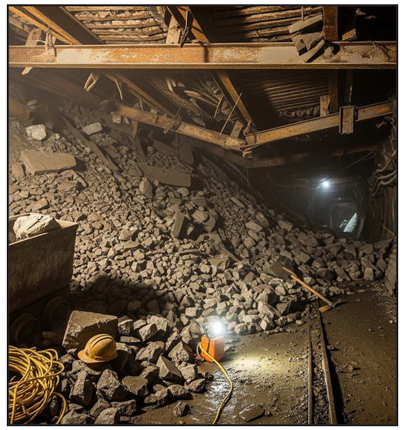
Codelco Confirms Death of Five Trapped El Teniente Miners

Chilean copper giant pledges investigation after quake triggered collapse

August 4, 2025

4.2 magnitude quake; 6 fatalities

A 4.2 magnitude tremor caused El Teniente mine’s collapse, killing six miners. President Boric declared three days’ mourning; investigations continue into causes at the world’s largest underground copper deposit.



"This tragedy hits us hard." — Maximo Pacheco

Lynas Sees ‘Rest of World’ Rare Earth Market Maturing

Expansion and sustainability upgrades position company as key supplier outside China

August 5, 2025

Mount Weld reserve: 32 Mt @ 6.4% TREO

Lynas Rare Earths’ Alex Logan says non-China rare earth supply chains in Korea, Vietnam, Europe, Canada, and the US are advancing, boosted by US Defense initiatives and a magnet plant MoU with Korea’s JS Link.

Lynas has ended China’s monopoly on heavy rare earth separation, boosting Mount Weld output to 1.3 Mt/y, producing 12,000 t/y NdPr, and implementing 70% renewable power and 90% water recovery sustainability measures.

"A vibrant outside-China rare earths industry is actually happening today." — Alex Logan

Fortescue Secures Nearly $2 Billion Loan to Support Decarbonisation Plans

Financing to advance clean energy strategy after scaling back hydrogen projects

August 8, 2025

$1.98 billion syndicated term loan

Fortescue secured a ¥14.2 billion (\$1.98 billion) loan to support decarbonisation after scaling back green hydrogen plans, cancelling projects, and expecting a \$150 million writedown, while maintaining strong China ties in iron ore and clean technology.

> *"China and Fortescue are advancing the green technology needed to lead the global green industrial revolution." — Andrew Forrest*

IGO Director Justin Osborne Resigns

Board renewal sees departure of exploration veteran

August 8, 2025

3 years on IGO board

IGO Ltd has announced the resignation of non-executive director Justin Osborne, effective 15 August 2025, as part of its board renewal process. Osborne joined in 2022 and chaired the nomination and governance committee.

The company credited Osborne's mineral exploration expertise with aiding a strategic review of its exploration business model. No successor has yet been named.

> *"Justin's deep industry experience brought valuable insight to our strategic review." — IGO spokesperson*

Codelco Mine Collapse Likely Triggered by Mining Activity

Internal review suggests geological stress from extraction caused fatal event

August 8, 2025

$7.5 million lost revenue per day

> *"Such seismic events are difficult to predict in deep, active mines." — Nicolas Munoz*

Sources indicate the 4.2-magnitude seismic event that killed six workers at Codelco's El Teniente mine was likely mining-induced. Analysts say the panel-caving method may have contributed to geological stress, causing a sudden rock-burst.

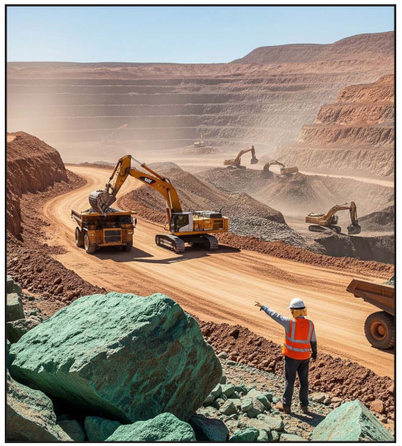
The mine remains shut, costing an estimated $7.5 million in copper revenue daily. Regulatory and union approval is required before reopening.

Koryx Copper Advances Haib Project in Namibia

Updated PEA confirms bioheap-leaching viability; $25M raised for advancement

August 8, 2025

$2.26B pretax NPV



Koryx Copper's updated preliminary economic assessment for the Haib copper project in Namibia outlines a 24-year mine life producing 35,332 t/y of copper cathode and 51,081 t/y of copper sulphate via bioheap-leaching.

The C$25 million in new funding will support technical studies, exploration, and corporate needs. The project has a pretax NPV of $2.26 billion and IRR of 52.2%.

> *"Haib's design eliminates conventional tailings, reducing environmental impact." — Koryx spokesperson*

BHP, Vale Offer $1.4 Billion UK Settlement Over Brazil Dam Disaster

Proposal includes $800M in victim compensation and $600M in legal costs

August 8, 2025

$1.4 billion proposed settlement

BHP Group and Vale have reportedly offered about $1.4 billion to settle a UK class action stemming from the 2015 Mariana dam collapse, one of Brazil's worst environmental disasters.

The proposal, made in June, allocates $800 million for victims and $600 million for legal costs. The London lawsuit, linked to joint venture Samarco, has been valued at up to £36 billion by claimants' lawyers.

> ***"This proposal aims to resolve a long-standing tragedy with fair compensation." — Source familiar with talks***

Capstone Copper Approves Mantoverde Expansion Project in Chile

MV-O project boosts throughput, extends mine life, and adds copper output

August 11, 2025

20,000 t/y copper boost

> ***"MV-O is a major milestone in our Mantoverde-Santo Domingo district growth plan." — Cashel Meagher***

- Approval: Capstone Copper okays Mantoverde Optimised expansion in Chile, securing DIA permit.
- Capacity: Boosts concentrator from 32,000 to 45,000 t/d.
- Output: +20,000 t/y copper, +6,000 oz/y gold.
- Mine Life: Extends from 19 to 25 years.
- Strategy: CEO cites growth focus, capital efficiency, strong returns.
- Timeline: Completion late 2026, full output early 2027.
- Capex: US$176M, up US$20M from estimate.

CATL Halts Lithium Mine Output in China Pending Licence Renewal

Yichun mine suspension sparks lithium price surge

August 11, 2025

8% jump in lithium futures

CATL has stopped operations at its Yichun lithium mine in Jiangxi province after its licence expired on 9 August. The company is applying for a renewal and expects to resume quickly. The halt drove lithium carbonate futures up 8% and lifted lithium miner shares globally.

CATL has stopped operations at its Yichun lithium mine in Jiangxi province after its licence expired on 9 August. The company is applying for a renewal and expects to resume quickly. The halt drove lithium carbonate futures up 8% and lifted lithium miner shares globally.

> ***"The news alleviates some oversupply pressures on lithium prices." — Tim Waterer***

White House to Clarify Tariff Confusion on Gold Bars

Yichun mine suspension sparks lithium price surge

August 11, 2025

9% proposed tariff on Swiss kilobars

The White House will issue an executive order clarifying US gold bar tariffs after a Customs ruling threatened 39% duties on Swiss kilobars, disrupting deliveries, with officials aiming to correct what may be a coding error.

- Customs ruling suggested 39% duty on Swiss kilobars.
- Triggered delivery halts by refiners and logistics firms.
- Swiss industry warned of export impact.
- Analysts note Comex gold stocks cushion supply.
- Clarification expected to resolve possible tariff code error.

"A 39% tariff is like pouring sand into a well-functioning engine." — Ross Norman

Barrick's DRC Mine Showcases African Greenness and Automation

Kibali leads in clean power, automation, and economic impact in the DRC

August 12, 2025

$6.3B invested in the DRC

Barrick Gold CEO Mark Bristow praised Africa as one of the company's "main cash generators" during Q2, highlighting strong results from the Kibali gold mine in the DRC. Co-owned with AngloGold Ashanti and SOKIMO, Kibali is Africa's largest gold mine and a global leader in sustainability and automation. The mine has invested over $6.3 billion locally, including $3.1 billion to local contractors. Recent additions include a solar power plant and battery storage, complementing its hydropower base. Kibali remains the biggest economic driver in Haut-Uele and Ituri provinces. Barrick also reported progress at North Mara and Bulyanhulu in Tanzania, the Lumwana Super Pit copper expansion in Zambia, and ongoing exploration along the ARK corridor. The Lumwana project is targeting 240,000 t/y of copper with a 30+ year mine life.

"Kibali stands as one of the greenest and most automated gold mines in the world." — Mark Bristow

Trump Confirms No US Tariffs on Gold

Markets rally as bullion escapes trade spat

August 12, 2025

2.4% drop in gold futures after tariff concerns eased

"The potential for disruption was incalculable — this is an enormous relief." — Ross Norman

US President Donald Trump announced that gold will not be subject to tariffs, ending speculation sparked by a US Customs ruling. The ruling had suggested Swiss kilobars might face a 39% duty, prompting market concerns and delivery pauses. Gold futures fell 2.4% to $3,407/oz after Trump's post, while spot gold slipped 1.2% to $3,357/oz. Analysts welcomed the move as a major relief for global bullion flows, particularly for Switzerland, the largest refining hub.

Hudbay Sells 30% of Arizona Copper Project to Mitsubishi for $600m

Strategic partnership secures funding, trims upfront costs

August 13, 2025

85,000 t/y copper production forecast

- Mitsubishi buys 30% of Copper World for $600 million.
- $420 million paid upfront, $180 million within 18 months.
- Hudbay delays major spending until 2028, saving $200 million.
- Copper World to produce 85,000 t annually for 20 years.
- Project to create 1,400 jobs and $850 million US taxes.

US Imposes Sanctions on Congo Armed Group, Mining Firms Over Illicit Minerals

Measures target militia, mining company, and Hong Kong exporters

August 13, 2025

15% of global coltan output from Rubaya region

The US has sanctioned Congo's PARECO-FF militia, mining company CDMC, and two Hong Kong exporters for illicit mineral sales, targeting a group that once controlled 15% of global coltan production, aiming to curb violence.

> *"We want all parties to realize there's a brighter economic future in a stable eastern Congo." — Senior US Official*

Orla Mining Cuts 2025 Output Forecast After Camino Rojo Pit Wall Incident

Wall failure prompts resequencing and higher costs

August 13, 2025

265,000–285,000 oz 2025 production forecast

Orla Mining has lowered its 2025 gold production forecast to 265,000–285,000 oz after a pit wall failure at Camino Rojo in Mexico. A 50–80 m pushback was required, but proactive monitoring prevented injuries. AISC guidance rose to $1,350–$1,550/oz.

Q2 saw record output of 77,811 oz, boosted by the Musselwhite mine in Canada. Net income hit $48.2-million, reversing a loss last year.

> *"Thanks to proactive monitoring, no injuries occurred." — Jason Simpson*

Waratah Minerals Raises A$30m to Accelerate Spur Drilling

Placement at premium to fund gold/copper exploration

August 13, 2025

A$30m raised at 7.1% premium

> *"The placement provides strong validation of our strategy." — Peter Duerden*

Waratah Minerals will raise A$30-million via a placement at A$0.575 per share, a premium to recent averages. Proceeds will fund drilling, metallurgical testing, and target definition at the Spur project in NSW.

Asante Gold Secures $500m Financing, Restructures Kinross Debt

Funds to advance Bibiani and Chirano mines in Ghana

August 13, 2025

$500m total financing package

Asante Gold has secured $500-million in financing and restructured debt owed to Kinross Gold. The package includes senior and mezzanine facilities, a gold stream, and private placements. Funds will advance mine development, repay liabilities, and provide working capital.

> *"This financing secures the path forward for Bibiani and Chirano." — Asante Management*

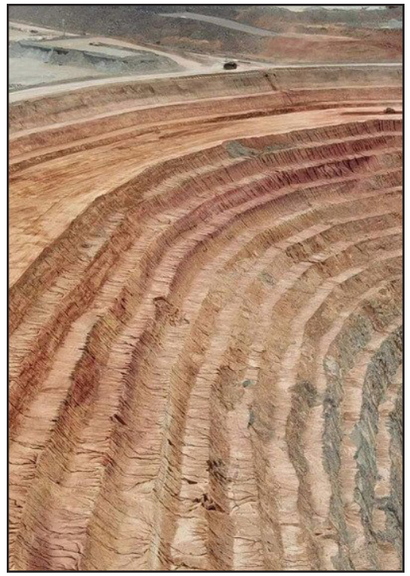
Mining Discovery is your inside edge on the global mining industry — connecting investors, executives, and innovators with the stories shaping the future of resources.

WE GO BEYOND HEADLINES TO DELIVER:

- In-depth coverage of mining companies driving growth across gold, copper, silver, and critical minerals.
- CEO insights & strategy straight from industry leaders at global events and investor conferences.
- Market intelligence that translates complex data into investor-ready trends, opportunities, and risks.
- Future-focused reporting on the technologies, ESG shifts, and capital flows redefining mining's next decade.

From exploration sites to boardrooms, ***Mining Discovery*** brings clarity to a fast-moving sector — helping stakeholders stay informed, ahead, and connected.

STAY AHEAD. STAY INFORMED. STAY MINING.



Evolution Mining Posts Record FY25 Profit, Boosts Dividend

Strong gold and copper output drive earnings surge

August 13, 2025

A$2.21b FY25 EBITDA

Evolution Mining reported record FY25 net profit of A$926-million, up 119%, with gold output rising 5% to 750,512 oz and copper up 12% to 76,261 t. A record final dividend of 13c/share was declared, taking the full-year payout to 20c.

"Our performance reflects operational and capital discipline." — Lawrie Conway

Galileo Confirms Copper at KCB Licences After Re-Evaluation

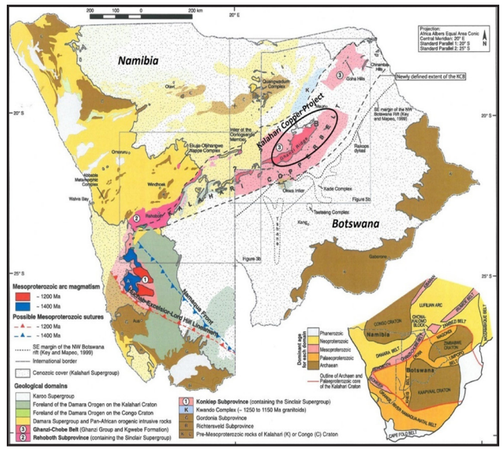
New analysis reveals previously unidentified mineralisation

August 13, 2025

0.96% — highest copper value from re-evaluation

Galileo Resources confirmed copper mineralisation at its Kalahari Copperbelt licences after re-evaluating earlier drilling using updated geological models and geochemical testing.

Copper minerals including chalcopyrite, bornite, and chalcocite were identified, with values up to 0.96%. RC drilling at PL253 will test targets.



"We have developed enough confidence in our modelling to undertake further drilling in the near term." — Colin Bird

Gold Price Could Double in 5–10 Years — Thorsten Polleit

Skepticism toward fiat currencies fuels safe-haven demand

August 13, 2025

Potential 2× price increase in 5–10 years

Thorsten Polleit, economist and publisher of the *BOOM & BUST REPORT*, predicts gold prices could double in 5–10 years as skepticism toward fiat currencies grows. He cites global debt expansion, persistent inflation, and the impossibility of sustained high interest rates as key drivers. Polleit expects central banks to cut rates, reintroduce financial repression, and possibly implement yield curve controls, boosting gold demand. With gold above \$3,300/oz and near record highs in multiple currencies, he sees strong momentum continuing. He forecasts higher prices before year-end, fueled by safe-haven demand and policies aimed at managing rising debt without harming economic growth.

"There is so much potential and momentum in gold that I expect we will see higher prices before year-end." — Thorsten Polleit

Canada Mining & Market Pulse

Global Shockwaves Jolt Markets

The pre-open buzz on Bay Street was tense as geopolitical tremors rippled across global markets. An Israeli military strike on Iran has spiked Middle East tensions, sparking a sell-off in global equities. European indices hit three-week lows, Wall Street futures dropped, and safe-haven assets like gold and the U.S. dollar saw sharp inflows.

Meanwhile, oil prices surged near multi-month highs, stoked by fears of disrupted supply from the region.

Canadian Economic Snapshot

StatsCan data released this morning shows sluggish industrial momentum:

- **Manufacturing Sales (April)**: -2.0% (Expected)
- **Wholesale Trade (April)**: -0.9% (Expected)
- **Capacity Utilization (Q1)**: 79.8%, unchanged from Q4 2024

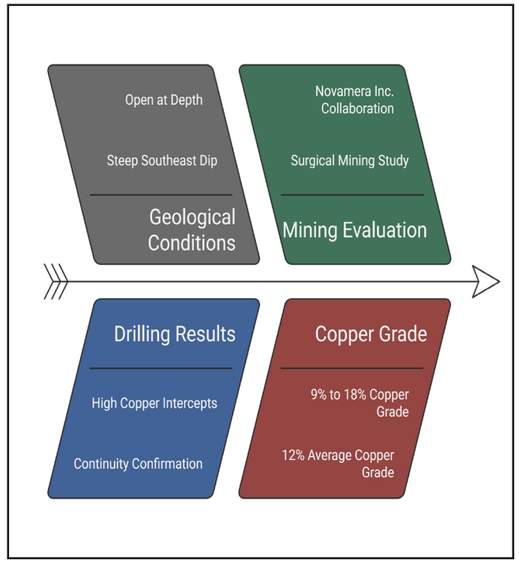
Mining Moves & Exploration Heatmap

Northstar Gold Corp.

Defining a Copper Core in Ontario

Northstar (CSE: NSG) has unveiled a high-grade Exploration Target at its Cam Copper Project near Kirkland Lake, Ontario. The No. 2 Zone is estimated to contain between 75,000 and 140,000 tonnes grading 9% to 18% copper, averaging a solid 12% Cu.

- Drilling confirms continuity with intercepts like 14.8% Cu over 2.45m
- The zone dips steeply southeast and remains open at depth
- A “Surgical Mining™ Evaluation Study” with Novamera Inc. is now underway



Analyzing the High-Grade Copper Exploration Target

Relevant Gold Corp.

Gearing Up to Drill at Wyoming’s Apex Zone

Relevant Gold (TSXV: RGC | OTCQB: RGCCF) received federal and state permits for a 5,000-metre drill program at the Apex Target in central Wyoming.

Key Highlights:

- Surface samples: up to 46.8 g/t Au, 7.8% Cu, and 2% Zn
- Structure spans a 2.5 km shear zone, comparable to Canada’s Abitibi Gold Belt
- Backed by Kinross; drilling begins shortly

Aurania Resources Ltd.

Shareholders Greenlight Future Strategy

Aurania (TSXV: ARU) confirmed approval of all motions at its Annual General Meeting, including:

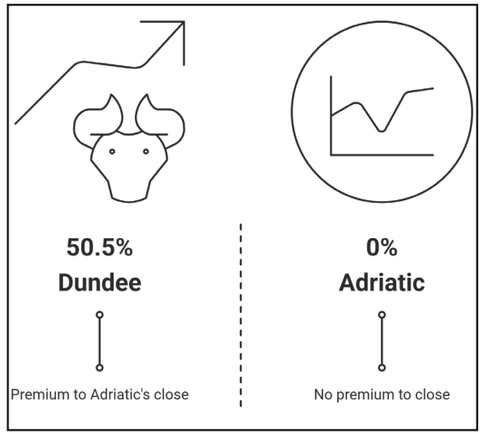
- Re-election of directors
- Financial statement acceptance
- Stock option plan renewal

CEO Dr. Keith Barron provided a project update — replay available on YouTube

Dundee Precious Metals Acquires Adriatic Metals

- Dundee agreed to acquire UK-based Adriatic Metals in a cash-and-stock deal valued at $1.25B, offering 268p per share (93p cash + 0.1590 new Dundee shares) — a 50.5% premium to Adriatic's close on May 19 pre-talks.
- The acquisition delivers full ownership of the Vares silver project in Bosnia and Herzegovina, expanding Dundee's European asset base.

Why it matters: Another headline cross-border deal underscores consolidation in precious metals and the strategic appetite for high-margin European projects.



Adriatic Metals Acquisition Premium

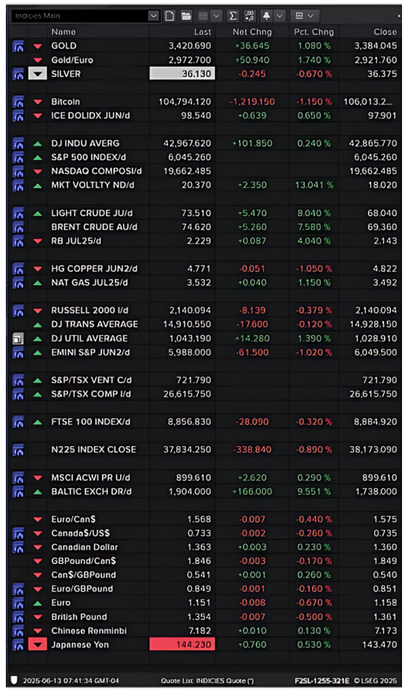
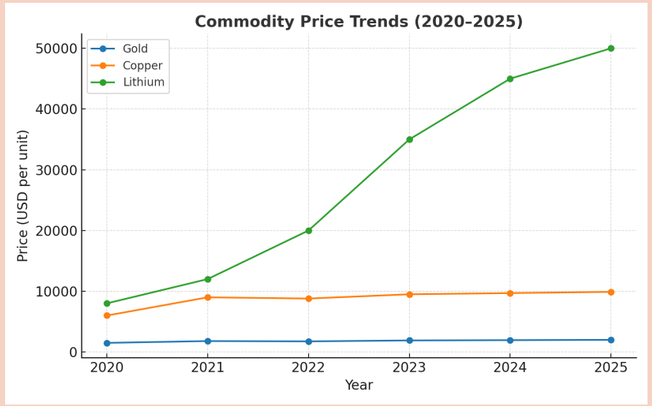
Investors shift to gold and Swiss franc, cut equities; oil price spike sparks inflation fears for energy-heavy industries.



What This Means for the Mining Sector

- Mining sector faces risks and opportunities from market volatility, commodity price shifts, and evolving trade policies.
- Producers likely to prioritize cost efficiency and strategic stockpiling.
- Exploration firms may adjust investment timelines amid tighter capital.
- Mid-tier/junior miners could seek joint ventures for competitiveness.



- Geopolitical changes may reshape export routes; Asia offers stable demand potential.

Bottom line: Agility and innovation will define the mining industry's winners in this evolving market.

US Markets

U.S. Markets React to Escalating Middle East Tensions

U.S. stock futures fell sharply Friday amid heightened conflict between Israel and Iran. Dow Jones Industrial Average futures slid 1.24%, S&P 500 futures dropped 1.21%, and Nasdaq 100 futures tumbled 1.48%.

Energy prices spiked as Brent and WTI crude futures surged over 8% on fears over global oil supply. Treasury yields and the dollar rose, while gold—a traditional safe haven—gained more than 1%.

The geopolitical shock came after Israel launched airstrikes on Iran, killing its most senior military official and the commander-in-chief of the Islamic Revolutionary Guard Corps, according to Iranian state media. Israel said the strikes targeted sites linked to Iran's nuclear program. Reports from Tehran cited multiple fatalities. In retaliation, Iran launched 100 drones toward Israel, rattling global markets.

Corporate Headlines

Advanced Micro Devices (AMD)

CEO Lisa Su unveiled AI-focused server products at the "Advancing AI" developer conference in San Jose. The MI350 and MI400 chip series aim to rival Nvidia's Blackwell processors. The upcoming Helios server, set for 2026, will house 72 MI400 chips, matching Nvidia's NVL72 server capabilities. OpenAI's CEO confirmed adoption of AMD's latest chips.

Apple Inc.

Customs data shows nearly all Foxconn-made iPhones exported from India between March–May went to the U.S., bypassing China tariffs. This marks a shift from 2024's 50% average U.S. share. iPhones recently hit #1 in China for May, with global sales up 15% year-on-year in April–May—Apple's strongest post-pandemic two-month performance, driven by growth in China and the U.S., according to Counterpoint Research.

Archer Aviation

The electric air taxi maker raised $850M after new executive orders by President Donald Trump supporting e-air taxis, drone defenses, and supersonic aircraft. Earlier in 2025, Archer secured $300M from investors led by BlackRock.

Archer-Daniels-Midland (ADM)

The soybean crusher cut oilseed bids ahead of the Trump administration's biofuel blending announcement, a key driver for soybean oil demand. ADM cited no insider knowledge of the pending decision and said basis bids reflect immediate market pricing pressures.

Europe & Asia Markets: Geopolitics, Trade Talks, and Corporate Moves

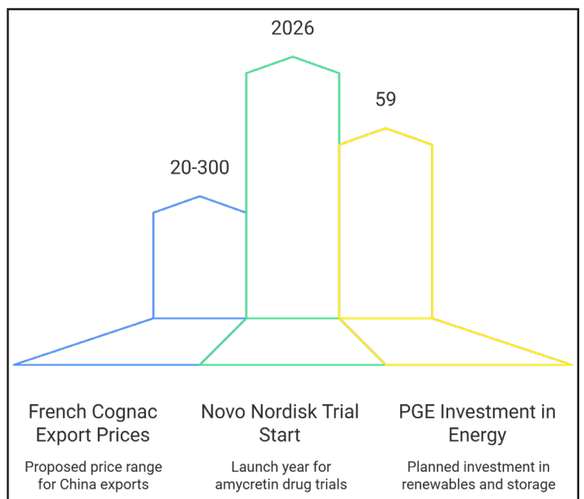
Middle East Tensions Spill Over

Israel has launched widescale strikes on Iran, targeting nuclear facilities, ballistic missile factories, and senior military commanders. Officials described the campaign as the start of a prolonged operation to block Tehran from developing an atomic weapon.

In Washington, the Trump administration moved to distance the U.S. from Israel's actions, wary of jeopardizing ongoing nuclear deal negotiations with Tehran. Separately, a U.S. appeals court allowed President Donald Trump to maintain National Guard deployments in Los Angeles amid protests over intensified immigration enforcement—temporarily pausing a lower court's ruling that blocked the mobilization.

Trade & Industry Developments

- French Cognac vs. China – Negotiators for French cognac producers proposed minimum export prices to China ranging from $20 to $300 per litre in an opening bid to end a tariff dispute, according to a document reviewed by Reuters.
- Novo Nordisk – The Danish drugmaker will begin late-stage trials in Q1 2026 for its experimental weight-loss drug amycretin—in both injectable and oral forms—for adults who are overweight or obese.
- PGE (Poland) – The nation's top utility plans to invest 235 billion zlotys (~$59B) by 2035 in renewables, gas-fired power plants, and energy storage under its new strategy.



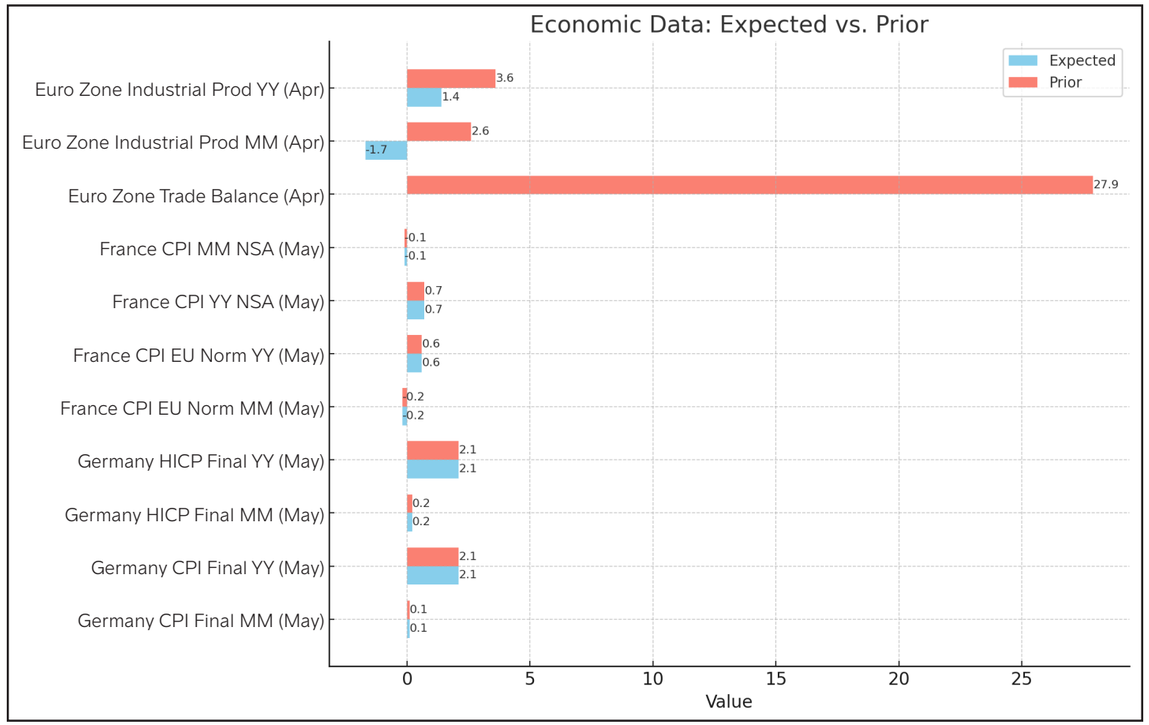
Financial and Strategic Initiatives in Global Markets

Pharma Headlines

Source: www.fiercebiotech.com

- AstraZeneca – Signed a $5B+ research deal with China's CSPC Pharmaceutical Group to co-develop pre-clinical candidates for chronic disease treatments. CSPC will lead AI-driven research in Shijiazhuang City. The partnership comes as AstraZeneca works to revive its China business following last year's arrest of its China president and possible import-related fines.
- GSK Plc – Applied to the European Medicines Agency to expand approval of its RSV vaccine Arexvy to at-risk adults under 50. Currently approved in the EU for those aged 60+ and certain adults 50–59, this move would put GSK in direct competition with Pfizer's Abrysvo in the 18–49 demographic.

Economic Data – Today's Watchlist (GMT)



Arras Minerals (TSX-V: ARK | OTCQB): ARRKF Strikes Big at Berezski Central

Record-breaking copper-gold intervals signal major expansion potential at Elemes Project

Headline Results

Hole EL25012

- 578m @ 0.41% CuEq (0.14% Cu, 0.21 g/t Au) from 3m depth
- Including:
  - 440m @ 0.49% CuEq from 137m
  - 114m @ 0.53% CuEq from 147m
  - 252m @ 0.52% CuEq from 325m

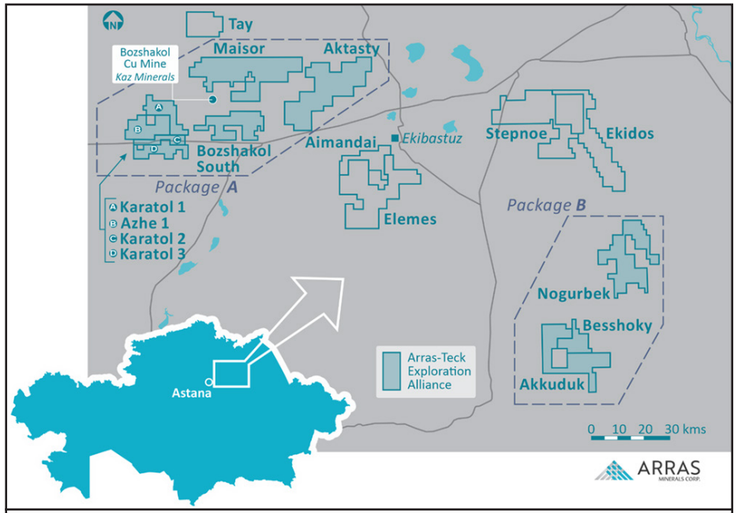


Figure 1. Arras Minerals Elemes Project and project portfolio located in Pavlodar, Kazakhstan along with reference to Kaz Minerals' Bozshakol Copper Mine

Hole EL25013

- ~300m of porphyry-style mineralization 1.7 km north of EL25012
- First hole drilled in 5 km gap between Berezski Central & Berezski North

"Hole EL25012 is the thickest gold-copper mineralization ever recorded at Berezski Central, showcasing the scale and depth potential of the system."— Tim Barry, CEO, Arras Minerals

Notes: Copper Equivalent ("CuEq") grades reported for the drill holes at Elemes were calculated using the following formula: CuEq % = Copper (%) + (Gold (g/t) x 0.8571) + (Silver (g/t) x 0.0117) + (Molybdenum (ppm) x 6.8568). AuEq grades reported for the drill holes at Elemes were calculated using the following formula: AuEq g/t = Gold (g/t) + (Copper (%) x 1.1667) + (Silver (g/t) x 0.0136) + (Molybdenum (ppm) x 8.0). Assumptions used for the copper and gold equivalent calculations were metal prices of US$3.75/lb. Copper, US$3,000/oz Gold, US$35/oz Silver, US$30/lb Molybdenum, and metallurgical recoveries were assumed to be 100%.

Program Overview

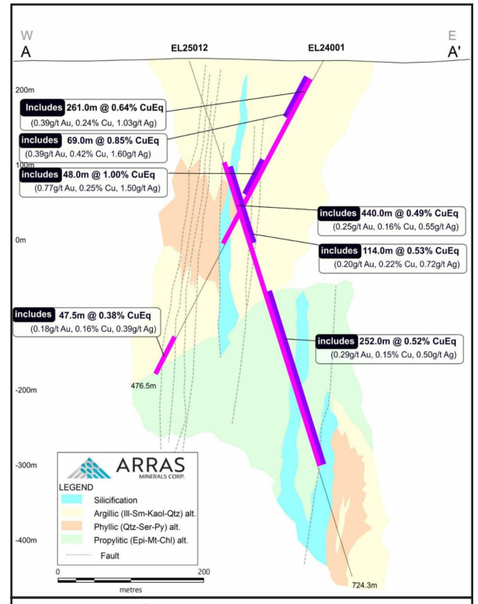
- Project: Elemes, Northeast Kazakhstan
- Trend Focus: Berezski & Aimandai
- Drill Rigs: 2 active on Berezski Trend
- Phase 2 Goal: 20,000 metres of drilling
- Progress: 7 holes complete; assays pending for remaining
- Surveys: Magnetotellurics & Gravity ongoing

Project Context

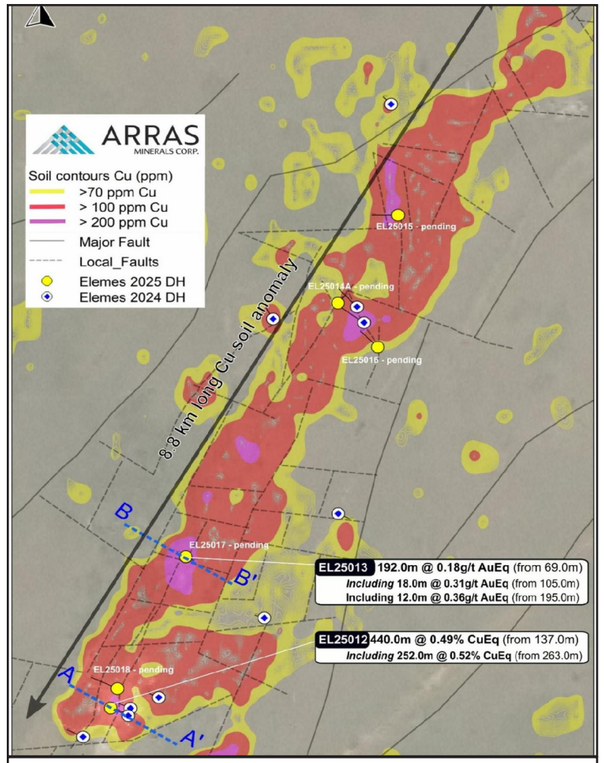
- Size: 531 km²
- Location: 13 km from Ekibastuz
- Infrastructure: Highway, power lines, rail access within 15 km
- Geological Belt: Bozshakol-Chingiz metallogenic belt
- Nearby Mines: Beskauga (~80 km E), Bozshakol (~60 km NW)

Corporate Update

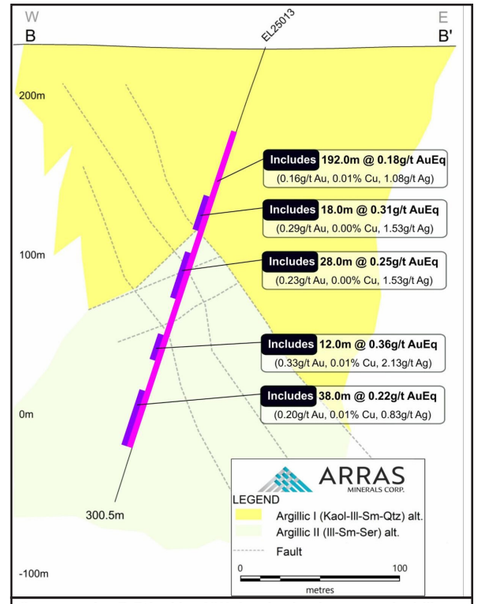
- DSUs Granted: 30,936 @ C$0.99 in lieu of cash for Q2 2025
- Total DSUs to Date: 70,434



Cross-section A-A' looking NW showing key intercepts in drill-holes EL25012, and 2024 drill hole EL24001. The cross-section demonstrates well developed strong porphyry-epithermal style of alteration hosting significant and consistent mineralization by depth that is starting close to the surface.



Map of the Berezski Target highlighting the 8.8 km copper-in-soil anomaly. Drill holes completed by Arras in 2024 are marked in white with a blue center, while holes drilled in 2025 to date are shown in solid yellow.



Cross-section B-B' looking NW showing key intercepts in drill-holes EL25013. The cross-section demonstrates epithermal style of alteration hosting consistent gold mineralization. This Drill Hole is 1.7 km NW from the Berezski Central target.
