U.S. Gold Corp.

U.S. Gold Corp Spotlights CK Gold Project at BIOBY Mining & Energy Expo

October 1, 2025

Panel on permitted copper projects underscores role in U.S. supply chains.

U.S. Gold Corp. (Nasdaq: USAU) is participating in the inaugural Better In Our Backyard (BIOBY) Mining & Energy Expo, October 1–3, 2025, in Bloomington, Minnesota. President & CEO George Bee joins industry leaders for a panel on "Permitted Copper Projects," focused on streamlined permitting's impact on domestic critical minerals.

Project highlight

CK Gold Project, Wyoming — Fully permitted, advanced-stage gold-copper deposit with a recent PFS indicating robust economics; targeting feasibility-level advancement in 2025.

> *"We are excited to participate in BIOBY's landmark Mining and Energy Expo... Our CK Gold Project is a testament to the viability of permitted U.S. copper and gold resources, and this panel offers an ideal opportunity to underscore how such projects can accelerate America's critical minerals independence while driving sustainable growth in mining communities." — George Bee, President & CEO, U.S. Gold Corp.*

Event snapshot

- **Event:** Better In Our Back Yard – Mining & Energy Expo 2025
- **Dates & Venue:** Oct 1–3, Mall of America (Bloomington, MN)
- **Panel:** "Permitted Copper Projects," Oct 2, 8:15–9:00 AM CT (Moderator: Chris Temple)
- **Registration:** Invitation Only

Why it matters

The BIOBY Expo convenes executives, landowners, investors, tribal advisors, manufacturers, and technology leaders to tackle permitting reform, critical-mineral supply chains, and infrastructure—highlighting momentum for responsible industrial development across the region.

Phenom Resources

Phenom Resources Closes $704,000 Private Placement with Strategic Investors

October 3, 2025

Financing led by major shareholders underscores long-term confidence in Phenom's exploration vision.

Phenom Resources Corp. (TSX-V: PHNM; FSE: 1PYO) has completed its fully subscribed, non-brokered private placement announced September 12, 2025. The Company raised gross proceeds of **$704,000** through the issuance of **4,400,000 units** at **$0.16 per unit**, subject to final approval from the TSX Venture Exchange.

> *"I would like to thank Bob Kopple and Eric Muschinski for their significant support in this financing. To them, and to all of our shareholders, we thank you for your continuing support." — Paul Cowley, President & CEO, Phenom Resources Corp.*

Financing overview

- **Total raised:** $704,000
- **Units issued:** 4,400,000
- **Issue price:** $0.16 per unit
- **Registration:** Invitation Only
- **Warrant:** 1 share at $0.22, exercisable until Oct 3, 2029
- **No finder's fees paid**
- **Hold period expires:** February 4, 2026

The financing saw significant participation from key backers — **Mr. Robert Kopple**, via KF Business Ventures LP (3,000,000 units), and **Eric Muschinski**, Phenom's largest shareholder (700,000 units).

Use of proceeds

Funds will be allocated toward exploration work programs across the company's properties and for general working capital purposes.

Outlook

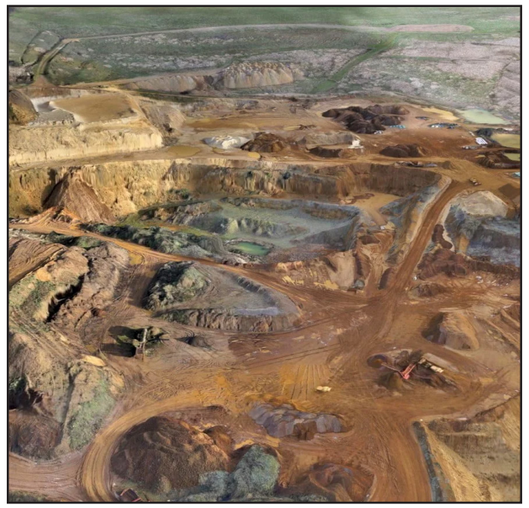
Phenom continues to advance its Nevada-based vanadium and gold projects while strengthening its capital base through shareholder-aligned financings. The offering remains subject to **final acceptance by the TSX Venture Exchange.**

Astra Exploration

Astra Exploration Announces $5 Million Bought Deal Financing

October 1, 2025

Strong participation from key shareholders, including Michael Gentile, underscores confidence in Astra's growth strategy.



Astra Exploration Inc. (TSX-V: ASTR; OTCQB: ATEPF; FSE: S3I) has entered into an agreement with **Cormark Securities Inc.**, acting as lead underwriter on behalf of a syndicate, for a **$5.0 million bought deal private placement**. The financing includes participation from strategic investors and existing shareholders such as **Michael Gentile**.

Use of proceeds

Proceeds will fund **exploration expenditures at the La Manchuria gold-silver project** in Argentina and support **general working capital** requirements. The offering is being conducted under the **Listed Issuer Financing Exemption**, allowing shares issued in Canada (excluding Quebec) to trade freely upon closing.

Financing overview

- **Shares issued:** 8,065,000
- **Price per share:** C$0.62
- **Gross proceeds:** C$5,000,300
- **Underwriters' option:** Up to 3,226,000 additional shares for C$2,000,120
- **Underwriters' commission:** 6% of proceeds (reduced to 3% for President's List orders)
- **Expected closing:** On or about October 8, 2025, subject to customary approvals

"This financing strengthens Astra's ability to advance our high-quality gold and silver assets across Argentina and Chile. The strong participation from key shareholders reflects continued confidence in our exploration portfolio and strategy." — Brian Miller, CEO, Astra Exploration Inc.

Astra Exploration Commences Phase II Drilling at La Manchuria Gold-Silver Project

October 29, 2025

Fully funded 10,000-metre campaign to expand high-grade epithermal system in Argentina's Deseado Massif.

Astra Exploration Inc. (TSX-V: ASTR; OTCQB: ATEPF; FSE: S3I) has commenced its **Phase II diamond drill program** at the **La Manchuria Gold and Silver Project** in **Santa Cruz, Argentina**, located in the prolific **Deseado Massif**. Mobilization is complete and drilling is now underway, targeting expansion of the extensive epithermal vein system defined during the successful Phase I campaign.

Program highlights

- **10,000 metres of diamond drilling** planned, with **5,000 metres to be completed by December 2025** and the remainder in **Q1 2026.**
- **Fully funded program** supported by a treasury exceeding **C$7 million**, ensuring uninterrupted progress through early 2026.
- **Phase I results** confirmed a much larger, near-surface gold-silver system than previously recognized, open in all directions.
- **Mapping and geophysics** identify widespread low-temperature silica, vein fragments, and favorable host rocks at depth — indicators of a robust, preserved LSE system.
- **Objective:** Define new high-grade zones and expand resource potential ahead of a future project-scale development decision.

"The start of Phase II drilling at La Manchuria marks an exciting step forward as we follow up on the exceptional potential outlined earlier this year. With strong funding and clear geological targets, Astra is well-positioned to advance discovery and build significant shareholder value." — Brian Miller, CEO, Astra Exploration Inc.

Outlook

Building on the success of Phase I, Astra's Phase II drilling will deepen understanding of **La Manchuria's high-grade gold-silver system** and support continued growth across its Latin American portfolio. The company's fully funded exploration pipeline positions Astra to deliver sustained progress across Argentina and Chile as it advances toward the **next generation of precious metal discoveries.**

Astra Exploration Closes C$6.25 Million Bought Deal Private Placement

October 8, 2025

Financing includes partial exercise of underwriters' option and insider participation from Michael Gentile.

Astra Exploration Inc. (TSX-V: ASTR; OTCQB: ATEPF) has successfully closed its previously announced **C$6.25 million bought deal private placement**, including the **partial exercise of the underwriters' option**. The offering consisted of **10,080,690 common shares** priced at **C$0.62 per share**, resulting in **gross proceeds of C$6,250,027.80**.

Use of proceeds

Funds will be directed toward **exploration programs at the La Manchuria gold-silver project** in Santa Cruz, Argentina, and for **general working capital.** Shares issued under the **Listed Issuer Financing Exemption** will not be subject to a hold period in Canada.

Financing overview

- **Total shares issued:** 10,080,690
- **Price per share:** C$0.62
- **Gross proceeds:** C$6,250,027.80
- **Lead underwriter:** Cormark Securities Inc. (lead and sole bookrunner)
- **Syndicate members:** Beacon Securities Limited and Research Capital Corporation
- **Underwriters' commission:** 6% (reduced to 3% for President's List orders)
- **Insider participation:** Michael Gentile acquired 282,300 shares for C$175,026
- **TSX-V final approval pending**

Key details

- The financing includes **partial exercise of the underwriters' option**, reflecting strong demand from investors.
- Participation from major shareholder **Michael Gentile** was deemed a related party transaction under MI 61-101 but exempt from valuation and minority approval requirements.

"The successful closing of this bought deal demonstrates strong investor support and validates Astra's vision to build a leading portfolio of gold and silver projects across Latin America." — Brian Miller, CEO, Astra Exploration Inc.

ARRAS Minerals

Arras Minerals Drills 457.5m Grading 0.63 g/t AuEq at Berezski East

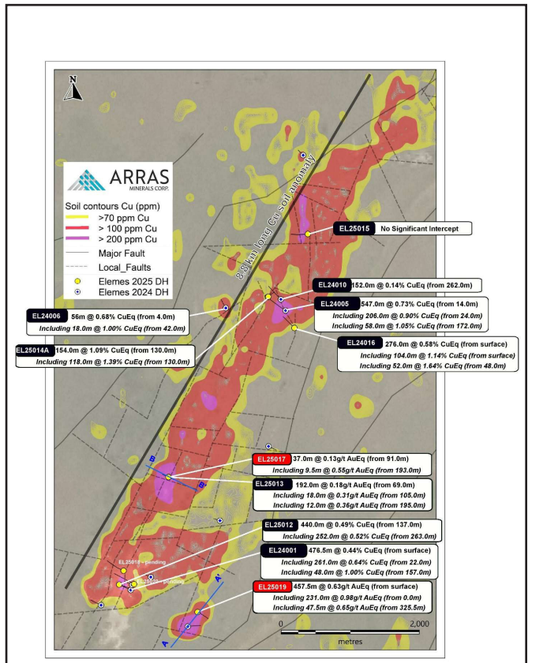
October 8, 2025

Strong copper-gold mineralization from surface highlights scale potential across Elemes Project.

Arras Minerals Corp. (TSX-V: ARK; OTCQB: ARRKF) has reported exceptional drill results from the Berezski East Target at its Elemes Project in northeastern Kazakhstan. The company's latest hole, EL25019, intersected 457.5 metres grading 0.63 g/t AuEq (0.61 g/t Au, 0.10% Cu) from surface, underscoring the growing potential for a large-scale copper-gold system along the Berezski Trend.

Drill highlights

- **457.5m @ 0.63 g/t AuEq,** including
  - 231.0m @ 0.98 g/t AuEq
  - 91.0m @ 1.77 g/t AuEq from 88m depth
- **Hole EL25017:** 37.0m @ 0.13 g/t AuEq
- **Strong potassic alteration and copper sulfides** (bornite, chalcopyrite) indicate proximity to a porphyry Cu-Au system
- **MT and gravity surveys** underway; results expected November 2025



"Hole EL25019 has delivered an exceptional high-grade gold-copper intercept from surface, confirming Berezski East's strong potential to host broad zones of high-grade mineralization. The alteration style and copper mineral assemblage suggest proximity to a porphyry system—a highly encouraging development." — Tim Barry, CEO, Arras Minerals Corp.

Exploration update

- **MT and gravity surveys** ongoing across Berezski East, Central, and Novii targets
- **New porphyry-style mineralization** discovered at Novii (hole NOV25003)
- **Phase II drill program** advancing with two rigs on site, over **6,000 metres drilled to date** of a planned **20,000-metre campaign**
- Surveys expanded by 100+ stations to cover new targets

Arizona Gold & Silver

Arizona Gold & Silver Samples Up to 7.95% Antimony at Silverton Project, Nevada

October 8, 2025

High-grade results confirm large-scale antimony-gold system; drilling program fully permitted to begin.

Arizona Gold & Silver Inc. (TSXV: AZS; OTCQB: AZASF) has reported high-grade **antimony sampling results** from its **Silverton Antimony-Gold Project** in Nye County, Nevada. The sampling program returned up to **7.95% Sb**, reaffirming Silverton's potential as a dual **Carlin-type gold** and **antimony-gold-silver vein** system.

Sampling highlights

- **Maximum grade:** 7.95% Sb (from 25.4 cm-wide stibnite-quartz vein)
- **Average grade:** 1.38% Sb across 14 samples
- **Sample area:** 500m strike × 300m width
- **Associated metals:** Anomalous Au and Ag values
- **Analyses:** Conducted by ALS Global (Tucson, Vancouver, Loughrea)

The recent field program reassessed historic samples collected by **Newcrest Resources (2002–2004)**, which focused on bulk-tonnage gold potential but did not assay high antimony over-limits. The new results validate the property's strong **critical minerals** potential, with antimony currently trading near **US$57.50/lb**.

> ***"These results confirm that Silverton hosts both significant gold potential and zones of exceptionally high-grade antimony mineralization. Given the growing importance of antimony as a critical metal, we see strong opportunity to develop Silverton as a key U.S.-based source." — Mike Stark, President & CEO, Arizona Gold & Silver Inc.***

Drilling program

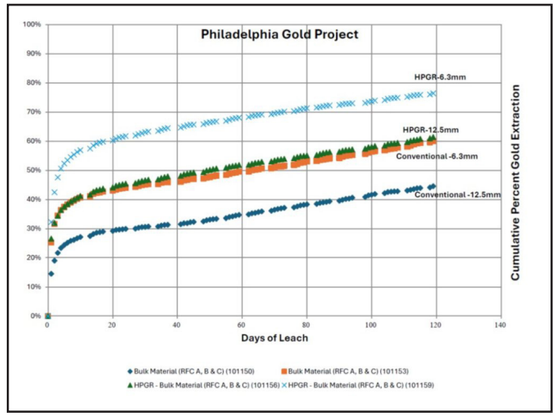
The **U.S. Bureau of Land Management** has accepted financial guarantees for a **27-hole reverse circulation drilling program** from **17 pads**. With road and pad construction authorized, drilling is permitted to commence immediately.

Arizona Gold & Silver Advances Metallurgical Program at Philadelphia Project

October 15, 2025

Column leach tests achieve 76% gold recovery; core drilling resumes on Perry Vein target.

Arizona Gold & Silver Inc. (TSXV: AZS; OTCQB: AZASF) reports encouraging progress from ongoing **metallurgical column leach tests** and confirms the resumption of core drilling at its flagship **Philadelphia Project** in Arizona. Results indicate strong heap leach potential for near-surface mineralization and continued high-grade exploration upside along the Perry Vein.



Exploration update

Core drilling has **resumed at the Perry Vein**, with hole **PC25-157** targeting a zone 60 metres north of the previously reported **20.43m @ 9.04 g/t Au** and **34 g/t Ag** (hole PC25-156). The drill will test along-strike continuity at the same elevation within the high-grade shoot.

Metallurgical highlights

- **HPGR crushed (-6.3mm) material:** 76% gold recovery and 40% silver recovery after 119 days
- **Gold recovery 16% higher,** silver recovery 12% higher vs. conventionally crushed material
- **Rapid kinetics:** 51% gold and 26% silver recovered within 4 days; 60% gold and 32% silver within 20 days
- **Target recovery:** 80% total gold within 150 days of leaching
- **Testing facility:** Kappes, Cassiday & Associates (Sparks, Nevada)

The metallurgical work demonstrates the effectiveness of **High Pressure Grinding Rolls (HPGR)** in improving gold extraction from fine-grained, microfractured ore. These findings support the potential for a **low-cost heap leach operation** complementing underground development of high-grade zones.

> ***"It is essential that a metallurgical program runs in parallel with exploration. These HPGR column leach results confirm the heap leach amenability of near-surface material and outline a viable path toward future development alongside high-grade underground targets." — Greg Hahn, VP Exploration, Arizona Gold & Silver Inc.***

Arizona Gold & Silver Strengthens Investor Relations with New Appointment

October 22, 2025

Company enters agreement with communications specialist Rose Athena Allan-McCachen to expand outreach and shareholder engagement.

Arizona Gold & Silver Inc. (TSXV: AZS; OTCQB: AZASF) has entered into an **investor relations agreement** with **Rose Athena Allan-McCachen**, effective **October 1, 2025**. The appointment supports the company's strategic focus on enhancing corporate visibility, investor communications, and market engagement as exploration advances across its U.S. gold-silver portfolio.

Agreement overview

- **Term:** Effective October 1, 2025, with an initial three-month probationary period
- **Consultant:** Rose Athena Allan-McCachen
- **Compensation:** Annual cash fee of $60,000, paid monthly
- **Stock options: 50,000 options** (5-year term) to be granted post-probation
  - Vesting schedule: 25% at grant; 25% after 6 months; 25% after 12 months; final 25% after 24 months
- **Approval:** Subject to **TSX Venture Exchange** review and compliance

The consultant acts at **arm's length** from the company and holds **no current interest** in its securities. Both parties have agreed to operate in full compliance with securities laws and TSX Venture Exchange policies.

> ***"As we continue to grow visibility and advance multiple exploration initiatives, strengthening our investor relations capacity is essential. Rose brings valuable communications and marketing expertise to help position Arizona Gold & Silver effectively in today's dynamic markets." — Mike Stark, President & CEO, Arizona Gold & Silver Inc.***

Loyalist Exploration

Loyalist Exploration Acquires Tully Property, Strengthening Timmins Gold Portfolio

October 3, 2025

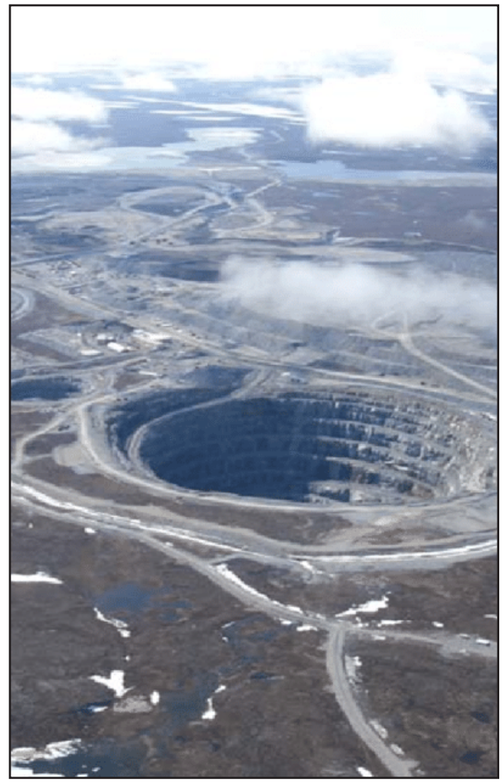
Acquisition from Fulcrum Metals and $653,000 first tranche financing reinforce Loyalist's "Buy Timmins" growth strategy.

Loyalist Exploration Limited (CSE: PNGC) has successfully completed the **acquisition of the Tully Property** from **Fulcrum Metals plc (LON: FMET)**, marking a major expansion of its gold asset base in the prolific **Timmins mining district**. The acquisition, originally announced April 9, 2025, aligns with Loyalist's strategy to consolidate high-quality gold assets in northern Ontario.

Transaction highlights

- **Acquisition consideration:**
  - C$500,000 cash payment
  - 78.7 million Loyalist shares issued to Fulcrum
  - Fulcrum retains **2.0% NSR**, with 1.0% buyback option for C$1 million
  - Additional 272,740 shares to be issued upon completion of the second financing tranche
- **Location:** 25 km northwest of **Timmins, Ontario**
- **Strategic significance:** Strengthens Loyalist's presence across Tully, Gold Rush, and Loveland properties, key pillars of its "Buy Timmins" initiative.

> ***"Tully, along with our Gold Rush and Loveland properties, is transformative for Loyalist. This acquisition and financing position us as a leading exploration and development company in Timmins. I'm very proud of the teamwork that brought this across the line." — Errol Farr, CEO, Loyalist Exploration Limited***



Outlook

The completion of the Tully acquisition and financing strengthens Loyalist's growth platform in the Timmins district. With new funding and expanded assets, the company is well-positioned to accelerate exploration and unlock near-term production opportunities across its gold portfolio.

Loyalist Exploration Engages Blue Heron for Permit Planning at Tully Gold Project

October 20, 2025

Partnership advances environmental and permitting roadmap for near-term development in the Timmins district.

Loyalist Exploration Limited (CSE: PNGC) has engaged **Blue Heron Solutions for Environmental Management Inc.** to lead **permitting and environmental baseline planning** for the company's recently acquired **Tully Gold Project**, located northeast of Timmins, Ontario. The collaboration marks the next step in advancing the project toward underground development and updated resource evaluation.

Project and engagement highlights

- **Blue Heron appointed** to design permit pathway and schedule for mining approval at Tully
- **Tully Project (458 ha)** — hosts historical resource of 107,000 oz gold (uncapped 144,000 oz)
- **Next steps:** Engage mining consultants for an NI 43-101 compliant resource and preliminary economic assessment
- **Deposit potential:** 600m strike and 400m depth extension with visible gold in quartz-carbonate veins
- **Strategic goal:** Advance environmental groundwork to align with Loyalist's Buy Timmins production strategy

Outlook

The engagement of Blue Heron marks an important move toward transforming **Tully** from an exploration-stage asset into a **permittable gold development project**. By initiating permitting groundwork early, Loyalist strengthens its path to future production decisions while maintaining momentum across its Timmins-area portfolio.

> ***"We are very pleased to commence the initial work on determining the environmental and permitting timelines to a production decision on Tully with Blue Heron. With gold prices at all-time highs, now is the time to take advantage of the potential resources at Tully and execute on the Company's Buy Timmins strategy." — Errol Farr, CEO, Loyalist Exploration Limited***

Loyalist Exploration Engages Caracle Creek for Loveland NI 43-101 Technical Report

October 21, 2025

Partnership advances environmental and permitting roadmap for near-term development in the Timmins district.

Loyalist Exploration Limited (CSE: PNGC) has engaged **Caracle Creek International Consulting Inc.** to prepare an **NI 43-101 Technical Report** for the company's **Loveland Gold-Copper-Nickel Project**, located in the prolific **Timmins mining district**. The report will establish a technical foundation for future exploration and compliance with Canadian Securities Exchange requirements.

Project highlights

- **Caracle Creek appointed** to complete the first NI 43-101 Technical Report on the Loveland Project
- **Loveland property:** 292 contiguous claims covering **6,244 hectares (15,430 acres)**
- **Historical zones:** Hollinger and Cominco with past estimates of **0.7% Ni / 0.4% Cu** and **0.7% Ni / 0.7% Cu**, respectively
- **Gold potential:** Drill intercepts up to **10.39 g/t Au over 3.1 m** and surface samples up to **11.48 g/t Au**
- **Exploration upside:** Open along strike and at depth across a 10 km mineralized corridor

Outlook

Completion of the NI 43-101 report will enhance the technical understanding of Loveland's multi-metal potential and position Loyalist for expanded exploration activity. The engagement underscores the company's continued commitment to advancing its Timmins-area projects toward long-term resource development.

> ***"We are very pleased to engage Caracle Creek to complete our first 43-101 Technical Report on Loveland. The report will guide our next exploration steps and further strengthen our execution of the Buy Timmins strategy." — Errol Farr, CEO, Loyalist Exploration Limited***

Loyalist Exploration Closes Second and Final Tranche of Non-Brokered Financing

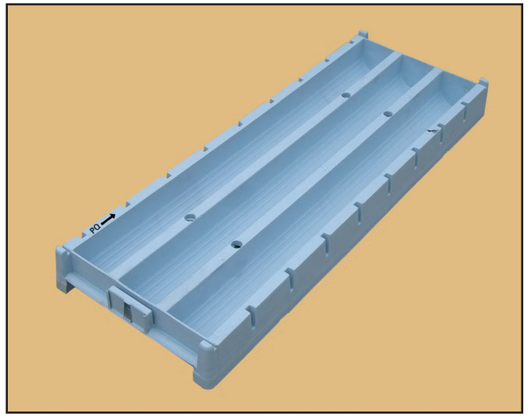
October 23, 2025

Completion of $710,000 offering and Tully acquisition marks key step in executing Loyalist's "Buy Timmins" strategy.

Loyalist Exploration Limited (CSE: PNGC) has closed the **second and final tranche** of its non-brokered private placement, raising total gross proceeds of **$710,000**. The financing supports the recently completed **Tully Gold Project acquisition** and strengthens the company's working capital for ongoing exploration.

Financing summary

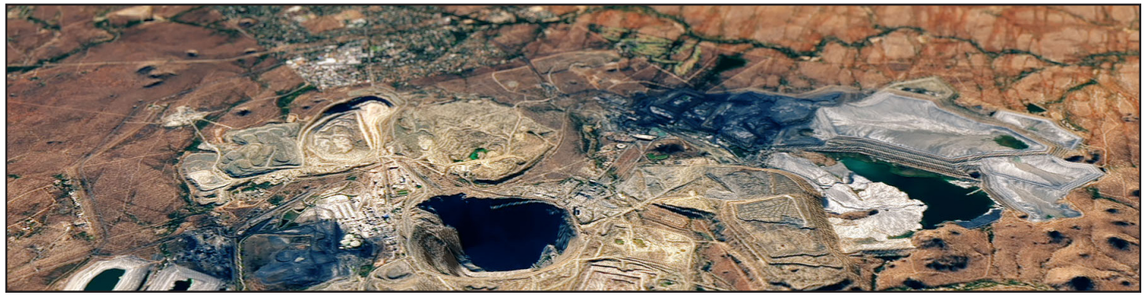
- **Final tranche:** 2.85M units sold for **$57,000,** completing the **$710,000 total financing**
- **Unit structure:** 1 common share + 1 warrant exercisable at **$0.05** for 48 months
- **Finder's fees:** $4,560 cash + 228,000 finder's warrants
- **Use of proceeds:** Funded Tully acquisition and general corporate purposes
- **Regulatory:** All securities subject to a 4-month hold period pending **CSE approval**



"With the successful completion of our $700,000 financing and the acquisition of the Tully Property, Loyalist reached another key milestone. We're now building out our team to drive exploration and development across our portfolio as we continue to execute on our 'Buy Timmins' strategy." — Errol Farr, CEO, Loyalist Exploration Limited

Forward path

The completed financing solidifies Loyalist's financial foundation and enables focused advancement across its Tully, Loveland, and Gold Rush projects. With funding secured and acquisitions finalized, the company is positioned to accelerate exploration efforts in the Timmins district through 2026.



Noble Plains Uranium Corp.

Noble Plains Uranium Closes $1.05 Million Over-Subscribed Private Placement

October 2, 2025

Financing supports upcoming drilling at Duck Creek and exploration across Shirley Basin projects in Wyoming.

Noble Plains Uranium Corp. (TSX-V: NOBL; FSE: INEO) has closed its **oversubscribed non-brokered private placement**, raising total **gross proceeds of $1,049,725** through the issuance of **11,663,611 units at $0.09 per unit**. The strong response reflects investor confidence in the company's growth strategy and upcoming U.S. uranium exploration programs.

Financing summary

- **$1.05 million raised** through 11.66M units at **$0.09** per unit
- **Each unit:** 1 share + ½ warrant (full warrant at **$0.15**, expiring Oct 2027)
- **Finder's fees:** $49,623 cash + 551,362 finder warrants
- **Insider participation:** 925,000 units for $83,250, under MI 61-101 exemptions
- **Proceeds:** Fund **Duck Creek drill program** and **Shirley Basin exploration**, plus general working capital

Outlook

With fresh capital and robust investor support, Noble Plains is set to accelerate its In **Situ Recovery (ISR)**-focused exploration in Wyoming's **Powder River and Shirley Basins**. The financing positions the company to advance drilling, expand its resource base, and strengthen its role in developing a **domestic U.S. uranium supply chain.**

"The strong demand for this financing allows our team to immediately advance drilling at Duck Creek, our flagship project in the Powder River Basin, and continue work across our Shirley Basin portfolio. It reflects our disciplined approach to raising capital in step with clear milestones." — Drew Zimmerman, President, Noble Plains Uranium Corp.

Noble Plains Uranium Signs Investor Relations Agreement with Capital Analytica

October 6, 2025

Partnership strengthens market communication and investor engagement as company advances U.S. uranium portfolio.

Noble Plains Uranium Corp. (TSX-V: NOBL; OTCQB: NBLXF; FSE: INEO) has entered into an **investor relations agreement** with **Triomphe Holdings Ltd. (operating as Capital Analytica)**, an arm's-length firm specializing in digital communications and market strategy. The six-month agreement aims to expand the company's investor reach and strengthen brand visibility across capital markets.

Agreement highlights

- Initial term: Six months starting October 3, 2025, at **C$20,000 per month** (paid in two installments)
- **Renewal option:** Additional six months at a reduced rate of **C$10,000 per month**
- **Stock options: 200,000 options** at **C$0.12**, valid for two years, subject to TSX-V vesting rules
- **Services include:** Market consulting, social media engagement, sentiment monitoring, and corporate video distribution
- **Service lead:** Managed by Jeff French, President of Capital Analytica

> *"Capital Analytica brings a strong digital communications focus and proven investor engagement strategies that align with our growth trajectory as we advance exploration across our U.S. uranium portfolio." — Drew Zimmerman, President, Noble Plains Uranium Corp.*

Strategic outlook

The collaboration enhances Noble Plains' ability to communicate progress and milestones to a broader investor audience as it accelerates work across its **ISR uranium projects** in Wyoming. Strengthened investor relations will support long-term market visibility and sustained shareholder growth.

Noble Plains Uranium Appoints Veteran Geologist Chris Healey to Board of Directors

October 8, 2025

Former Cameco ISR specialist joins Board to strengthen technical leadership and advance Wyoming uranium strategy.

Noble Plains Uranium Corp. (TSX-V: NOBL; OTCQB: NBLXF; FSE: INEO) has appointed **Chris M. Healey, P.Geo.**, to its **Board of Directors**, adding more than four decades of uranium exploration and development experience. Mr. Healey's expertise in In **Situ Recovery (ISR)** and sandstone-hosted uranium systems will directly support Noble Plains' advancement across its Wyoming project portfolio.

Board appointment highlights

- **40+ years uranium experience**, including **20 years with Cameco Corporation**
- Served as **District Manager, Cameco Resources (US) Inc.** and **Senior Geologist – ISR Operations** at the **Highland Mine, Wyoming**
- Held senior roles with **Titan Uranium, Cue Resources, and U.S. Energy Corp.**
- **Specialist in ISR geology**, resource definition, and roll-front deposit modeling
- **Succeeds Lorne Warner**, who continues to contribute as a technical consultant

> *"We are delighted to welcome Chris to the Board of Directors. His experience with ISR uranium operations in Wyoming, particularly his time with Cameco in Casper, will be invaluable as Noble Plains works to define a compliant resource base and advance our projects." — Drew Zimmerman, President, Noble Plains Uranium Corp.*

> *"I am excited to join Noble Plains at such a pivotal stage. Having spent many years on ISR projects in Wyoming, I see tremendous potential in Noble's portfolio and look forward to contributing to its growth." — Chris Healey, P. Geo., Director, Noble Plains Uranium Corp.*

Outlook

The addition of Chris Healey reinforces Noble Plains' **technical depth and local expertise** as it accelerates exploration and development across the **Powder River and Shirley Basin uranium projects**. His experience at **Cameco's ISR operations** strengthens the company's capacity to progress toward resource definition and near-term development milestones in Wyoming.

Gold Hunter Resources

Gold Hunter Receives Final District-Scale VTEM Data for Great Northern Project

October 8, 2025

Survey results set the stage for first systematic drill campaign across Newfoundland's largest consolidated gold district.

Gold Hunter Resources Inc. (CSE: HUNT; OTCQB: HNTRF; FSE: 6RH) has received the **final Geotech Ltd. VTEM™ Plus airborne survey data** for its flagship **Great Northern Project (GNP)** in Newfoundland. The survey marks the **first-ever high-resolution district-scale VTEM dataset** covering the entire 49 km strike length of the project. **Campbell & Walker Geophysics** is completing final analysis and interpretation, with results expected in the coming weeks.

Key developments

- **VTEM dataset finalized**, enabling detailed drill target refinement ahead of a planned **Phase 1 drill program**
- **Great Northern Project:** 49 km of strike with **two defined gold deposits** — Thor and Rattling Brook — both starting near surface
- **Resource base:** Thor hosts **51,000 oz Au (Indicated)**; Rattling Brook holds **255,000 oz Au (historical estimate)**
- **Bridge loan financing: $400,000 interest-free** facility secured to fund target definition and drilling preparation
- **Investor outreach:** Participation confirmed in the **Canadian Coast to Coast Gold Roadshow** (Calgary, Toronto, Vancouver)

> ***"The final VTEM interpretation is the last critical piece of data required to design a systematic and aggressive drill campaign at the GNP. We're prioritizing targets now and plan to launch drilling before year-end, ensuring continuous momentum and shareholder catalysts well into 2026." — Sean Kingsley, President & CEO, Gold Hunter Resources Inc.***

Forward path

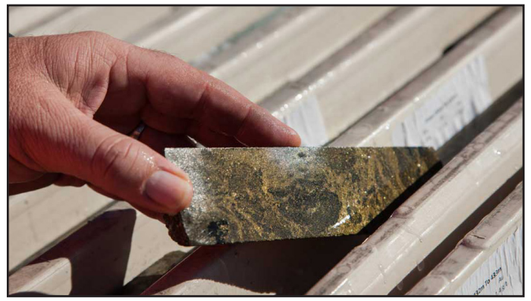
Completion of the VTEM analysis marks a pivotal milestone in advancing the **Great Northern Project** toward its first district-wide drill program. With financing secured and technical groundwork complete, Gold Hunter is positioned to unlock significant new discovery potential across one of Newfoundland's most prospective and actively consolidating gold belts.

Kodiak Copper Corp.

Kodiak Copper Expands MPD Project with Strategic Acquisition and Soil Program Launch

October 20, 2025

Acquisition of Ketch claims strengthens MPD's district-scale potential and advances exploration at MPD Northwest.



Kodiak Copper Corp. (TSX-V: KDK; OTCQB: KDKCF; FSE: 5DD1) has expanded its flagship **MPD copper-gold project** in southern British Columbia through the acquisition of a **13.1 km² claim package** from **Eagle Plains Resources Ltd.** The newly acquired **Ketch claims** adjoin the MPD Northwest area and align along trend with the **Ketchan deposit**, a key mineralized zone within MPD's growing resource base. A **2,000-sample soil geochemistry program** is now underway across priority targets.

Transaction and exploration highlights

- **13.1 km² of new ground acquired**, extending MPD to **357 km² total area**
- **Ketch claims** lie immediately north of the **Ketchan deposit (1.8 km × 0.5 km)**, part of MPD's Initial Mineral Resource
- **24 known mineral occurrences** at MPD Northwest, including six with porphyry-style copper-gold mineralization
- **2,000-sample soil program** launched to evaluate AI-driven and historical targets, expected to complete in **November 2025**
- **Deal terms:** 300,000 Kodiak shares issued **+ 2% NSR**, with 1% buyback option for **C$1.75M**

> ***"Kodiak's strategy to consolidate the MPD district over the past seven years has been key to building the scale required for a potential mine. The acquisition of the Ketch claim package is a logical next step — it's strategically positioned along the Ketchan trend and could host an extension of our existing deposit." — Claudia Tornquist, President & CEO, Kodiak Copper Corp.***

Outlook

Kodiak's Ketch acquisition and soil program advance MPD's multi-center porphyry potential, driving district-scale copper-gold discovery across seven zones in infrastructure-rich British Columbia.

Kodiak Copper Launches Next Phase of Metallurgical Testwork at MPD Project

October 28, 2025

Program expands metallurgical dataset across six zones to enhance copper-gold recovery and support resource definition.

Kodiak Copper Corp. (TSX-V: KDK; OTCQB: KDKCF; FSE: 5DD1) has initiated an **additional metallurgical testwork program** at its 100%-owned MPD copper-gold porphyry project in southern British Columbia. The program builds on positive results from the **Q2 2025 metallurgical campaign** and aims to optimize both copper and gold recoveries across multiple deposits within the MPD system.

Program highlights

- **Comprehensive testwork** will include composite samples from six key zones — **Gate, Man, Dillard, West, Adit, and South.**
- **Objectives:** Enhance recoveries for copper and gold through gold characterization studies and flotation optimization.
- **Results expected Q1 2026**, supporting the upcoming **maiden mineral resource estimate** and future project development.
- **Technical partners:** Program managed by **JDS Energy & Mining Inc.**, with laboratory work conducted by **Base Metallurgical Laboratories Ltd. (BaseMet)** in Kamloops.
- **Quality oversight:** Supervised by **Tad Crowie, P.Eng.**, an independent Qualified Person under NI 43-101, ensuring best-in-class metallurgical standards.

> *"We're pleased to launch this next round of metallurgical testwork — a key de-risking step for MPD. These studies will refine our understanding of metal recoveries and help unlock additional value as we move toward a resource estimate and future economic studies." — Claudia Tornquist, President & CEO, Kodiak Copper Corp.*

Outlook

The expanded metallurgical program represents a major advancement in Kodiak's **systematic de-risking of the MPD Project**, designed to strengthen the resource model and enhance economic potential ahead of development. With multiple mineralized zones open for expansion and strong technical partners in place, Kodiak continues to position MPD as a district-scale **copper-gold opportunity** in British Columbia's Quesnel Terrane.

Dryden Gold Corp.

Dryden Gold Discovers High-Grade Gold at Hyndman Project

October 2, 2025

Channel sampling returns up to 36.9 g/t gold; new discovery to be drill-tested as part of fully funded 2026 exploration program.

Dryden Gold Corp. (TSX-V: DRY; OTCQB: DRYGF; FSE: X7W) has announced a new gold discovery at its **Hyndman Project**, located on the eastern portion of the company's large land package in the Dryden District of northwestern Ontario. Channel sampling returned **23.32 g/t gold over 2.80 metres**, including **36.90 g/t gold over 0.70 metres**, confirming the presence of a high-grade gold-bearing shear-vein system.

> *"Making a new discovery at Hyndman validates our district-wide strategy and marks a major milestone for our 2025 exploration campaign. The mineralization is remarkably similar to the nearby Goldlund Deposit, but with several times the strike potential." — Maura Kolb, President, Dryden Gold Corp.*

> *"Hyndman's accessibility and geological continuity make it an exceptional target. With the 2026 drill program fully funded, we're positioned to rapidly advance multiple projects across the Dryden Gold District." — Trey Wasser, CEO, Dryden Gold Corp.*

Discovery highlights

- **Channel samples** returned up to **36.90 g/t Au over 0.70 m**, supporting a **positive drill decision for 2026**
- **Hyndman shear-vein system** extends across a **5 km strike potential**, within a 400 m-wide diorite intrusion
- **Favorable geology:** Shear zones with strong quartz veining, pyrite mineralization, and hematite-ankerite alteration
- **Excellent infrastructure:** Direct highway access, railway crossing, and proximity to Ontario grid power
- **Next phase:** Drill testing at Hyndman to follow pending soil-till assay results and mapping integration

Outlook

The Hyndman discovery expands Dryden Gold's regional growth pipeline and complements its flagship **Gold Rock Target Area**, where drilling continues to intersect high-grade structures. As part of the 2026 exploration campaign, Hyndman will move from surface evaluation to **drill-ready status**, further solidifying Dryden's position as a leading gold explorer in Ontario's next major district.

Dryden Gold Discovers Broad Mineralized Gold System and Purchases Royalties at Sherridon

October 14, 2025

First-pass drilling confirms large gold-bearing corridor; royalty buyback strengthens project ownership.

Dryden Gold Corp. (TSX-V: DRY; OTCQB: DRYGF; FSE: X7W) has reported encouraging **drill results from its first-pass exploration program** at the **Sherridon Project**, located 35 km south of the Gold Rock Camp in the Dryden District. The drilling intersected multiple broad zones of anomalous gold mineralization, confirming the presence of a large mineralized corridor extending over five kilometers. The company has also completed the **purchase of two net smelter return (NSR) royalties** covering select claims at Sherridon.

Key developments

- Broad gold zones discovered: Up to 1.28 g/t Au over 19.00 m, including 36.40 g/t Au over 0.50 m, within wide mineralized structures.
- Multiple mineralized zones: Gold-bearing intervals intersected across three drill holes within a five-kilometer geophysical anomaly.
- New deposit model: Alteration style suggests potential for bulk-tonnage, lower-grade gold system distinct from Gold Rock and Hyndman.
- Royalty acquisition: Two 2% NSRs purchased for C$20,000, consolidating ownership of Sherridon; remaining 1% royalty payable to Alamos Gold.
- Follow-up work: Resampling of historical drill core and multi-element geochemical studies underway to refine future drill targeting.

"These first holes at Sherridon validate our district-scale strategy and reveal an entirely new mineralization style within the Dryden District. We're excited by the bulk-tonnage potential and the opportunity to strengthen project ownership through royalty consolidation." — Trey Wasser, CEO, Dryden Gold Corp.

Outlook

The Sherridon results establish a new gold system within the Dryden District, marking the company's second regional discovery in 2025 alongside Hyndman. With resampling and geochemical modeling in progress, Dryden Gold is well positioned to refine targets for a 2026 follow-up program that could further define the district's large-scale gold potential.

Dryden Gold Concludes Successful 2025 Exploration Campaign

October 23, 2025

Channel sampling returns up to 36.9 g/t gold; new discovery to be drill-tested as part of fully funded 2026 exploration program.

Dryden Gold Corp. (TSX-V: DRY; OTCQB: DRYGF) has completed its **2025 Exploration Campaign**, achieving key milestones across its multi-target gold portfolio in the **Dryden District, Ontario**. The company drilled **15,000 metres**, completed its summer fieldwork, and now awaits **19 pending assay results** from the **Gold Rock, Mud Lake**, and regional exploration programs.

2025 program highlights

- **Gold Rock expansion:** Multiple high-grade, parallel gold-bearing structures extended along strike; **15 holes pending** as footprint continues to grow.
- **Mud Lake validation:** Four-hole drill program completed to confirm deposit-scale periodicity **2 km northeast of Gold Rock**, assays pending.
- **Hyndman discovery:** Channel samples up to **36.9 g/t Au** led to a positive drill decision for 2026, targeting a **4 km shear-vein system.**
- **Sherridon breakthrough:** Broad, bulk-tonnage-style gold zones intersected over **five-kilometre anomaly**, establishing a new deposit model for the district.
- **Regional coverage:** Over **4,200 till and soil samples** collected across 70,000+ ha to refine future targeting and prioritize exploration corridors.

"The 2025 exploration program has been a tremendous success, validating our district-wide growth strategy. Gold Rock continues to expand, while our regional work at Hyndman and Sherridon has delivered new discoveries. With our team, facilities, and data foundation in place, we are well prepared to accelerate into 2026." — Trey Wasser, CEO, Dryden Gold Corp.

Outlook

Dryden Gold's 2025 campaign established a foundation for **multi-asset growth within a single emerging gold district**. The company enters 2026 with **a fully funded drill program**, advancing high-grade expansion at Gold Rock and first-pass drilling at Hyndman and Sherridon — reinforcing its vision to define a **district-scale gold system** in northwestern Ontario.

DigiPower X

Digi Power X Achieves Tier III Certification for ARMS 200 and Sets Deployment Timeline

October 1, 2025

Certification milestone positions company among elite global providers of modular AI data centers.

Digi Power X Inc. (Nasdaq: DGXX; TSX-V: DGX) has achieved **Tier III certification** from EPI under the globally recognized **ANSI/TIA-942 standard** for its **ARMS 200 (AI-Ready Modular Solution)** platform — a major step forward in its modular data center strategy. This designation places Digi Power X among a select group of companies worldwide delivering **enterprise-grade, AI-ready data infrastructure** with 99.982% availability.

Operational and strategic highlights

- **Tier III certified ARMS 200** confirmed by **EPI**, ensuring concurrent maintainability and high-availability reliability.
- **First ARMS 200 pod** to be delivered to the **Alabama facility by November 2025**, with commissioning in **December 2025**.
- **Expansion plans:** Scalable ARMS 500 (5 MW) and ARMS 1000 (10 MW) clusters under development for AI, cloud, and blockchain workloads.
- **Strategic alliance with Supermicro:** Integration of **AI-optimized rack-scale systems** positions Digi Power X as a turnkey Tier III-ready provider.
- **Robust balance sheet:** $29M in total assets, including **100 BTC and 1,000 ETH**, supporting infrastructure growth and self-mining operations.

> ***"Tier III certification for ARMS 200 represents a turning point for Digi Power X. We're now among the few companies globally that can deliver modular, enterprise-grade AI data centers with rapid deployment timelines." — Michel Amar, CEO, Digi Power X Inc.***

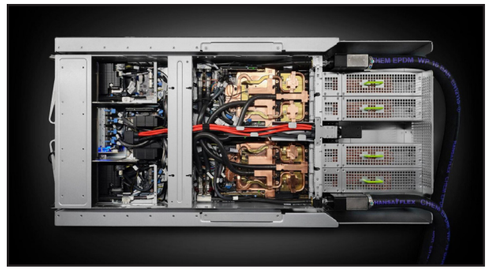
Outlook

Digi Power X's Tier III achievement reinforces its AI-power integration strategy, advancing ARMS models to meet rising global hyperscale data center demand.

Digi Power X Expands ARMS-200 Fleet and Unveils "NeoCloudz" Retail Compute Platform

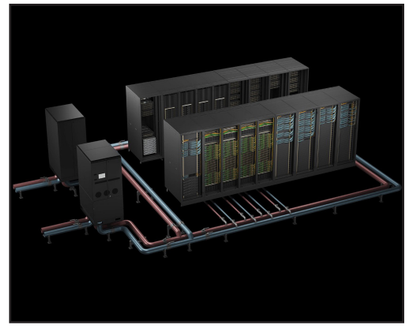
October 21, 2025

New GPU expansion and retail AI platform mark next phase in Digi Power X's modular data center strategy.



Digi Power X Inc. (Nasdaq: DGXX; TSX-V: DGX) has announced a major expansion of its **AI data center capacity**, adding **five new ARMS-200 GPU modules** at its **Columbiana, Alabama facility**, scheduled to come online in **March 2026**. The expansion will bring the company's total capacity to **2,304 high-performance GPUs**, strengthening its position as a leading **GPU-as-a-Service (HPC and AI)** provider for artificial intelligence, cloud, and blockchain workloads across North America.

Strategic highlights



- **Five new ARMS-200 modules** under construction, boosting total capacity to **2,304 GPUs** by early 2026.
- **Launch of "NeoCloudz":** A retail compute platform offering on-demand GPU access via an intuitive, cloud-native interface.
- **Built on Supermicro architecture** with **Tier III-certified infrastructure, liquid cooling, and low-latency networks** for enterprise-grade reliability.
- **Strong financial position:** ~$60 million in cash and digital asset holdings with **no long-term debt**, ensuring expansion flexibility.
- **55 MW Alabama data center** expanding to meet surging demand from AI, cloud, and decentralized compute clients.

> ***"Our expansion reinforces Digi Power X's commitment to building scalable, high-density GPU environments for the next generation of AI applications. The launch of NeoCloudz opens our platform to developers and enterprises alike, combining reliability with accessibility." — Alec Amar, President, Digi Power X Inc.***

Outlook

The addition of new ARMS-200 modules and the launch of NeoCloudz mark a pivotal step in Digi Power X's evolution from infrastructure provider to **comprehensive AI compute service platform**. With significant financial strength and Tier III-certified capacity, the company is positioned to **scale rapidly into the retail AI compute market** while maintaining its leadership in modular data center innovation.

Digi Power X Appoints Wealth Management Leader Ajay Gupta to Board of Directors

October 22, 2025

Appointment brings deep financial strategy and global investment expertise to support Digi Power X's AI infrastructure growth.

Digi Power X Inc. (Nasdaq: DGXX; TSX-V: DGX) has appointed **Ajay Gupta, CPWA, CRPC, CIMA**, to its **Board of Directors**, effective **October 21, 2025**. Mr. Gupta is a veteran wealth management executive, investor, and family office principal, widely recognized for his leadership in building and advising some of the most prominent financial organizations in the United States.

Key appointment highlights

- **Ajay Gupta joins Digi Power X Board,** bringing over 25 years of experience in wealth management, alternative investments, and family office leadership.
- **Founder of Gupta Wealth Management**, later merged with **Creative Planning**, a US$390 billion registered investment advisor, where he served as **Chief Investment Strategist.**
- **Principal of Robbins Gupta Holdings**, the exclusive family office for **Tony Robbins** and the Gupta family.
- Featured in **Tony Robbins' #1 New York Times bestseller**, Money: Master the Game, for his insights with top global investors.
- Active board member for **CAZ Investments, The Chopra Foundation**, and the **Tony Robbins Foundation**, emphasizing philanthropy in education and health.

"Ajay's exceptional track record in wealth management and alternative investments makes him an outstanding addition to our Board. His global perspective and strategic insight will be invaluable as Digi Power X accelerates at the intersection of clean power, AI, and digital infrastructure." — Michel Amar, Chairman & CEO, Digi Power X Inc.

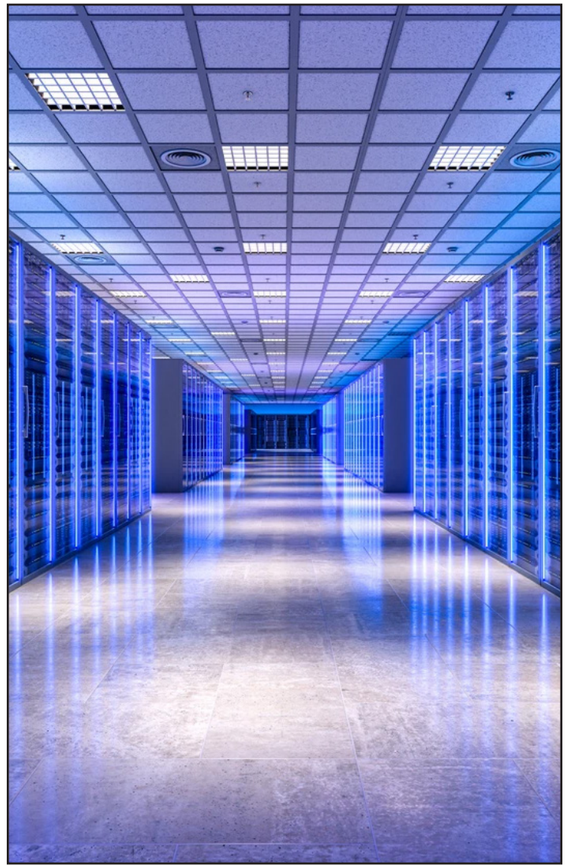
Outlook

The addition of Ajay Gupta strengthens Digi Power X's **corporate governance and financial expertise** as it scales its Tier III-certified data center infrastructure and GPU-as-a-Service platforms. His appointment supports the company's broader strategy to **bridge institutional finance with the rapidly expanding AI and energy infrastructure sectors.**

Digi Power X to Announce Q3 2025 Financial Results on November 13

October 30, 2025

Company to host conference call and operations update the following morning to discuss performance and growth outlook.



Digi Power X Inc. (Nasdaq: DGXX; TSX-V: DGX), a U.S. developer of **Tier III-grade AI and high-performance computing (HPC) infrastructure**, will announce its **financial results for the third quarter ended September 30, 2025**, after market close on **November 13, 2025**. The company will also host a **conference call and webcast** the following morning to review quarterly performance, operational updates, and strategic progress across its AI data center platform.

Key details

- **Earnings release:** November 13, 2025 (after market close).
- **Investor conference call and webcast:** November 14, 2025, at **8:30 AM ET.**
- **Call access:** 1-877-407-9039 (U.S. toll-free) or 1-201-689-8470 (international).
- **Web access:** Call Me link and live webcast via www.digipowerx.com
- **Participants:** Digi Power X executives will discuss financial performance, operational milestones, and near-term strategic priorities.

"Our Q3 results and upcoming operations update will demonstrate continued progress across our AI data infrastructure platform. We look forward to engaging with our investors as we advance Digi Power X's mission to deliver scalable, sustainable, and Tier III-certified compute solutions." — Michel Amar, CEO, Digi Power X Inc.

Outlook

The upcoming results announcement underscores Digi Power X's continued execution toward **expanding its AI-ready modular data center fleet and sustainable energy infrastructure**. Supported by strong financial positioning and operational growth, the company remains focused on **long-term scalability, profitability, and clean energy integration** across its North American footprint.

West Red Lake Gold Mines

Madsen Mine Ramp-Up Gains Momentum in Q3 Update

October 7, 2025

Q3 gold output rises 34% to 7,055 ounces; mine remains on track for commercial production in early 2026.

West Red Lake Gold Mines Ltd. (TSX-V: WRLG; OTCQB: WRLGF) has provided an operational update for the **third quarter (Q3) of 2025**, highlighting continued progress in the **ramp-up of its Madsen Mine** located in the Red Lake Gold District, Ontario. Ore production, processing performance, and underground development all advanced as planned, positioning the mine for commercial production early next year.

Operational highlights

- **Gold production:** 7,055 ounces poured in Q3, up 34% from Q2 (5,260 oz), generating **C$33 million** in proceeds at an average realized gold price of **US$3,456/oz.**
- **Ore mined:** 35,700 tonnes at an average grade of **5.4 g/t Au**, with strong reconciliation between modeled and actual grades.
- **Ramp-up milestones:** Underground waste rock storage system fully operational, boosting ore haulage efficiency and ventilation capacity.
- **Infrastructure progress:** Shaft system nearing completion; designed to move **350 tonnes/day** of ore starting in **November 2025.**
- **Fleet expansion:** Final deliveries of a 42-tonne haul truck and two Komatsu 4-yard scoops expected by year-end, completing the planned mining fleet.

> ***"Ramp-up at Madsen is progressing well. We're seeing tonnages rise, efficiencies increase, and gold production grow quarter by quarter, exactly as planned. These steady gains are positioning Madsen for commercial production in early 2026." — Shane Williams, President & CEO, West Red Lake Gold Mines Ltd.***

Outlook

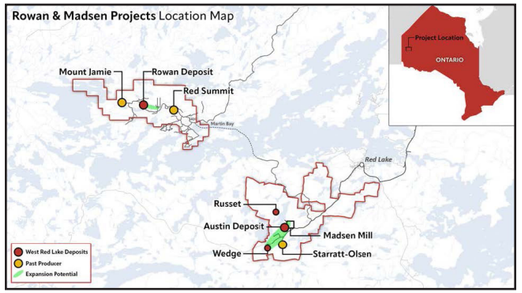
With ore production and recoveries improving steadily, West Red Lake Gold is on track to achieve **stable operations and commercial production in Q1 2026**. The completion of underground infrastructure and shaft commissioning will further increase throughput capacity, while mine planning and grade control systems position Madsen for long-term, high-margin production in the **heart of the Red Lake gold district.**

West Red Lake Gold Hits New High-Grade Gold Lens in Lower Main Austin

October 9, 2025

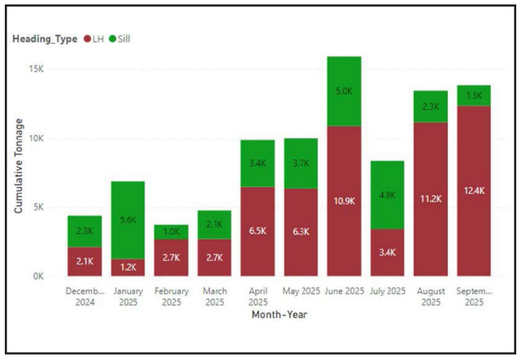
Underground drilling at Madsen returns 139.45 g/t Au over 7.8m and 74.70 g/t Au over 8.7m, confirming strong continuity at depth.

West Red Lake Gold Mines Ltd. (TSX-V: WRLG; OTCQB: WRLGF) has reported impressive new drill results from the **Lower Main Austin Zone** at its **100%-owned Madsen Mine** in the **Red Lake Gold District**, Ontario. These intercepts, from recently initiated underground drilling, confirm the presence of high-grade gold mineralization comparable to the company's successful **South Austin Zone**.



Drilling highlights

- **7.75m @ 139.45 g/t Au**, including **2.0m @ 532.25 g/t Au** (Hole MM25D-12-4860-004)
- **8.70m @ 74.70 g/t Au**, including **3.0m @ 134.58 g/t Au** (Hole MM25D-12-4860-005)
- **7.45m @ 18.31 g/t Au**, including **0.5m @ 254.49 g/t Au** (Hole MM25D-12-4860-002)
- **2.95m @ 21.18 g/t Au**, including **1.0m @ 57.67 g/t Au** (Hole MM25D-12-4860-006)
- **3.9m @ 13.00 g/t Au**, including **1.0m @ 44.62 g/t Au** (Hole MM25D-12-4860-009)**



These intercepts were drilled from the **12 Level (~600m depth)** and align along the same **plunge line as South Austin**, suggesting up to **600 metres of continuity** within a new high-grade panel of the Madsen orebody.

> ***"We are only just beginning to test the deeper portions of the Main Austin Zone, and we're already being rewarded with broad, high-grade intercepts similar to those that made South Austin so successful. This confirms significant ounce and tonnage potential remaining at depth." — Shane Williams, President & CEO, West Red Lake Gold Mines Ltd.***

Outlook

These latest results reinforce Madsen's potential as a **multi-zone, high-grade gold system** with substantial upside at depth. Ongoing drilling through 2025 will continue targeting **new lenses within the Lower Main Austin Zone** to grow the mineral resource and support the company's strategy to **restart production** at one of Canada's most prolific gold districts.

West Red Lake Gold Commences 5,000-Metre Drill Program at Rowan Project

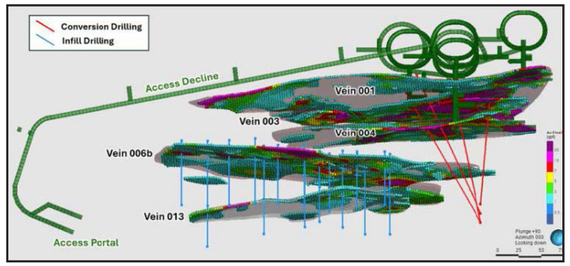
October 28, 2025

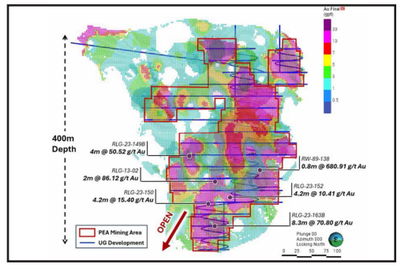
Program targets resource conversion and expansion ahead of combined Pre-Feasibility Study for Rowan and Madsen.

West Red Lake Gold Mines Ltd. (TSX-V: WRLG; OTCQB: WRLGF) has commenced a **5,000-metre infill and conversion drill program** at its **100%-owned Rowan Project** in the Red Lake Gold District of northwestern Ontario. The program will refine the project's resource model and provide critical data for the **planned combined Pre-Feasibility Study (PFS)** integrating Rowan with the Madsen Mine.

Program highlights

- **5,000 metres of HQ diamond drilling** underway, focusing on **Veins 001, 004, 006b, and 013** to upgrade Inferred resources and expand mine planning optionality.
- **PEA outlines strong economics:** Rowan projected to produce **35,230 oz gold per year** over five years at **8.0 g/t Au**, with **42% after-tax IRR** (July 2025 PEA).
- **Conversion drilling** aims to bring Veins 001 and 004 into the Indicated category — which already account for **72% of contained ounces** in the PEA model.
- **Integration potential:** Veins 006b and 013 could allow **mine access six months earlier**, improving project NPV and advancing near-term production.
- **Permitting progress:** Advanced Exploration Permit targeted for **2027**, supported by Ontario's new One Project, One Process framework to streamline mine approvals.





"It's very exciting to have drilling underway again at Rowan. Success here could position West Red Lake Gold to achieve a combined production rate of up to 100,000 ounces annually across Red Lake. With gold prices near all-time highs, we expect strong project economics from the combined PFS." — Shane Williams, President & CEO, West Red Lake Gold Mines Ltd.

Outlook

The Rowan drill campaign represents the next step in West Red Lake Gold's strategy to unlock **synergies between Rowan and Madsen** through shared infrastructure and coordinated mine planning. The results will underpin a **combined PFS expected in Q3 2026**, setting the stage for long-term growth and establishing a clear valuation benchmark for the company's Red Lake gold portfolio.

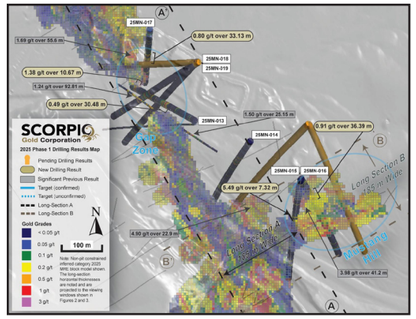
Scorpio Gold Corp.

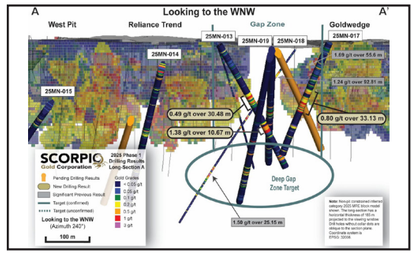
Scorpio Gold Intersects 10.07 g/t Gold over 5.94m at Manhattan District, Nevada

October 14, 2025

Additional results from Phase 1 drilling confirm strong continuity and near-surface high-grade zones across multiple targets.

Scorpio Gold Corp. (TSX-V: SGN; OTCQB: SRCRF; FSE: RY9) has announced new assay results from **Phase 1 of its 2025 drilling program** at the **Manhattan District Project** in **Nevada, USA**. The program targeted multiple zones along the Reliance Trend, Mustang Hill, and Gap Zone, all of which continue to demonstrate significant expansion potential near the past-producing pits.





Drilling highlights

- **Hole 25MN-016:** 0.91 g/t Au over 36.39m, including **2.97 g/t Au over 3.41m** and **3.33 g/t Au over 4.08m** (Mustang Hill).
- **Hole 25MN-017:** 0.80 g/t Au over 33.13m, including **10.07 g/t Au over 5.94m** (Reliance Trend).
- **Hole 25MN-013:** 0.49 g/t Au over 30.48m (Gap Zone).
- Hole 25MN-015: 5.49 g/t Au over 7.32m (Mustang Hill).
- **Program total:** 12 diamond drill holes (4,216m) completed, with **four additional holes pending assay** results.

The results confirm broad zones of **continuous gold mineralization** connecting the **historic Goldwedge Underground and West Pit mines**, establishing extensions across the **Reliance Trend and Gap Zone**. At **Mustang Hill**, multiple near-surface high-grade intercepts reinforce the area's importance as a growth target with open-pit potential.

"These results continue to demonstrate the scale and continuity of mineralization at Manhattan, directly supporting our objective of expanding the maiden resource toward our two-million-ounce gold target. With Phase 1 complete and additional assays pending, we're well positioned to accelerate into Phase 2 drilling." — Harrison Pokrandt, VP Exploration, Scorpio Gold Corp.

Outlook

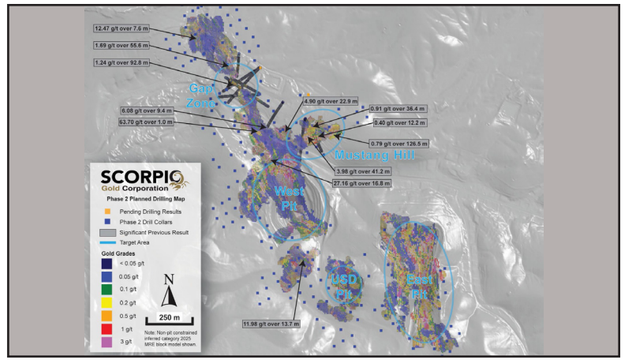
Scorpio Gold concludes Phase 1 drilling and prepares an expanded Phase 2 program with two more rigs, targeting West Pit and Mustang Hill to complete 50,000 metres by August 2026.

Scorpio Gold Commences 50,000-Metre Phase 2 Drilling Program at Manhattan District

October 22, 2025

Three rigs mobilized to accelerate resource expansion and upgrade targeting multi-million-ounce gold potential in Nevada.

Scorpio Gold Corp. (TSX-V: SGN; OTCQB: SRCRF; FSE: RY9) has launched **Phase 2 drilling** at its **Manhattan District Project in Nevada, USA,** marking the next stage in advancing one of the state's most promising consolidated gold districts. The new campaign will total a **minimum of 50,000 metres** of diamond and reverse circulation drilling, building on the success of the recently completed **Phase 1 program** and **maiden Mineral Resource Estimate (MRE)** announced in September.



Program highlights

- **Three rigs now active:** Two diamond drills and one reverse circulation rig to complete **~200 holes** by **August 2026.**
- **Resource growth focus:** Targeting **infill and step-out drilling** northwest of the West Pit along the **Reliance Trend** to expand continuous mineralization.
- **High-priority targets:** Extending near-surface zones at **Mustang Hill** and converting **historic Keystone-Jumbo resources** into compliant NI 43-101 categories.
- **Multi-million-ounce potential:** Phase 2 aims to establish a **district-wide compliant resource across** Manhattan's 4,780-hectare land package.
- **Assays pending:** Final results from four remaining **Phase 1 holes (1,465m)** expected shortly, following recent intercepts up to **10.07 g/t Au over 5.94m.**

> ***"The launch of Phase 2 marks a major acceleration for Scorpio Gold as we build on the momentum of our maiden resource. With three rigs in operation, we're executing aggressively to expand what we believe can become a significant multi-million-ounce gold system at Manhattan." — Zayn Kalyan, CEO & Director, Scorpio Gold Corp.***

Outlook

Phase 2 drilling positions Scorpio Gold for a transformational year of **resource expansion and de-risking** across the Manhattan District. By integrating high-grade historical zones with new discoveries from Phase 1, the company is advancing toward a **comprehensive NI 43-101 resource update** while continuing to deliver steady exploration milestones through 2026.

Scorpio Gold Files NI 43-101 Technical Report for Manhattan District Project

October 23, 2025

Filing confirms 740,000-ounce maiden inferred resource and outlines district-scale expansion potential in Nevada.

Scorpio Gold Corp. (TSX-V: SGN; OTCQB: SRCRF; FSE: RY9) has filed its **independent NI 43-101 Technical Report** detailing the **maiden Mineral Resource Estimate (MRE)** for the **100%-owned Manhattan District Project in Nye County, Nevada, USA**. The report also includes a **historical resource estimate** for several satellite deposits within the district and provides an extensive technical foundation for future development and resource growth.

Technical highlights

- **Maiden MRE:** 740,000 ounces of gold inferred at **1.26 g/t Au** (0.3 g/t Au cut-off), based on **1,341 drill holes** totaling **92,635 metres.**
- **Historical MRE:** 303,949 ounces of gold inferred at **5.89 g/t Au**, from 1.65 million tonnes across the **Black Mammoth, April Fool, Hooligan, Keystone, and Jumbo** zones.
- **Geological model:** Interprets a **low-sulfidation, epithermal, gold-rich system** adjacent to the **Manhattan Caldera** within Nevada's **Walker Lane Trend.**
- **Historic production:** ~700,000 ounces of gold extracted from placer and lode operations since the late 1890s.
- **Technical report authors:** Archer Cathro Geological (US) Ltd., Daniel Kunz & Associates, Geosyntec Consultants, and Fort Lowell Consulting PPLC.

> ***"The filing of our NI 43-101 Technical Report is a significant milestone for Scorpio Gold. This marks the first time the entire Manhattan District has been consolidated under one company, with defined resources, extensive data, and a clear pathway for expansion." — Zayn Kalyan, CEO & Director, Scorpio Gold Corp.***

Outlook

The Technical Report reinforces **Manhattan's status as a premier gold district within Nevada's Walker Lane Trend**, underpinned by strong infrastructure, existing permits, and a strategic 4,780-hectare land package. With multiple deposits open for expansion and drilling already underway under **Phase 2**, Scorpio Gold is well positioned to advance toward a **district-scale, multi-million-ounce resource base.**

MINING DISCOVERY NOVEMBER 2025 EDITION

UNCOVER THE WORLD OF MINING, METALS & DIGITAL RESOURCES

Stay ahead with Mining Discovery Magazine, your monthly gateway to global mining developments. The November issue brings sharp insights and detailed coverage across gold, silver, copper, rare earths, uranium, and bitcoin mining, spotlighting the projects, people, and policies shaping tomorrow's resource economy.

Discover:

- Exclusive company reports and financing updates
- New discoveries and exploration milestones across continents
- Energy transition metals and critical mineral trends
- AI, blockchain, and bitcoin mining infrastructure insights
- Expert outlooks on global commodity markets

Join the mining leaders who read Mining Discovery every month, where every issue connects opportunity with discovery.
