U.S. Gold Corp.

U.S. Gold Corp. to participate at 2025 precious metals summit

September 4, 2025

Management team to present and hold meetings with investors at the premier conference in Beaver Creek, Colorado.

U.S. Gold Corp. announced it will attend the prestigious 2025 Precious Metals Summit in Beaver Creek, Colorado. President & CEO George Bee will deliver a presentation and the management team will meet with investors to provide updates on the company's CK Gold Project.

> ***"We are excited to be attending the 2025 Precious Metals Summit... We look forward to sharing the value proposition of U.S. Gold with the investment community and those in the precious metals space and providing updates on the progress of our CK Gold Project." – George M. Bee, U.S. Gold President and CEO***

Key Highlights

- U.S. Gold Corp. will attend the 2025 Precious Metals Summit in Beaver Creek, Colorado, from September 9-12.
- President & CEO George Bee is scheduled to deliver a corporate presentation on Wednesday, September 10th.
- The management team will be available for meetings with institutional investors to provide updates on the CK Gold Project.

U.S. GOLD CORP

George Bee
President and CEO

Company Profile

- Focus: Gold & Copper Exploration and Development
- Jurisdiction: United States (Wyoming, Nevada, Idaho)
- Flagship Project: CK Gold Project (Wyoming)
- Strategy: Advancing a portfolio of U.S.-based exploration properties, with the CK Gold Project at the Preliminary Feasibility Study stage.

U.S. Gold Corp to attend mining forum Americas 2025

September 10, 2025

Company to present project updates at the world's most prestigious precious commodity equities investment forum in Colorado Springs.

U.S. Gold Corp. (NASDAQ: USAU) has announced it will attend the Denver Gold Group's 37th Annual Mining Forum Americas 2025 Conference. The event, held at the Broadmoor Hotel & Resort in Colorado Springs from September 14-17, is considered the world's oldest and most prestigious investment forum for precious commodity equities.

Presented annually since 1989, the conference showcases seven-eighths of the world's publicly traded gold and silver companies. It attracts leading specialist and generalist institutional investors, private equity, hedge funds, and analysts from around the globe. Mr. George Bee will present an update on U.S. Gold's projects on September 16th at 4:00 PM Mountain Time. The company's management will also be meeting with investors during the conference.

Key Highlights

- U.S. Gold Corp. will attend the Mining Forum Americas 2025 Conference at the Broadmoor Hotel & Resort in Colorado Springs.
- Mr. George Bee is scheduled to provide an update on the company's projects on Tuesday, September 16, 2025.
- Management will participate in meetings with institutional investors, private equity firms, and hedge funds throughout the event.

Key Info	Details
Event	Mining Forum Americas 2025
Dates	September 14-17, 2025
Location	Colorado Springs, CO
U.S. Gold Presentation	Sept. 16 @ 4:00 PM (MT)

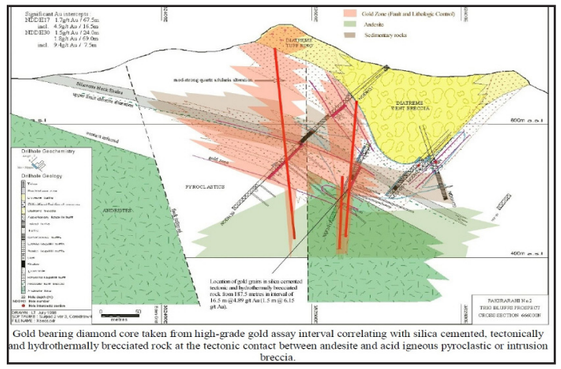
> ***"The Conference is the world's oldest and most prestigious precious commodity equities investment forum." – Denver Gold Group***

Astra Exploration

Astra mobilizes ground crews at LA Manchuria Project

September 11, 2025

Work to include mapping, magnetics, and sampling ahead of Phase II drill program in Santa Cruz, Argentina.



Astra Exploration Inc. has mobilized ground crews to its La Manchuria Gold and Silver Project in Santa Cruz, Argentina, to begin pre-drilling fieldwork. This work will prepare the project for a Phase II drill program scheduled to commence in three to four weeks as winter conditions subside.

> ***"Winter weather conditions are subsiding, and we are eager to re-commence drilling operations as soon as possible." – Brian Miller, CEO, Astra Exploration***

Key Highlights

- U.S. Gold Corp. will attend the 2025 Precious Metals Summit in Beaver Creek, Colorado, from September 9-12.
- President & CEO George Bee is scheduled to deliver a corporate presentation on Wednesday, September 10th.
- The management team will be available for meetings with institutional investors to provide updates on the CK Gold Project.

Brian Miller
President and CEO

Company Profile

- Focus: Precious Metals Exploration
- Jurisdiction: Latin America (Argentina, Chile)
- Flagship Project: La Manchuria Gold-Silver Project (Argentina)
- Strategy: Building a portfolio of high-quality projects in key mining jurisdictions, focused on high-grade gold and silver epithermal deposits.

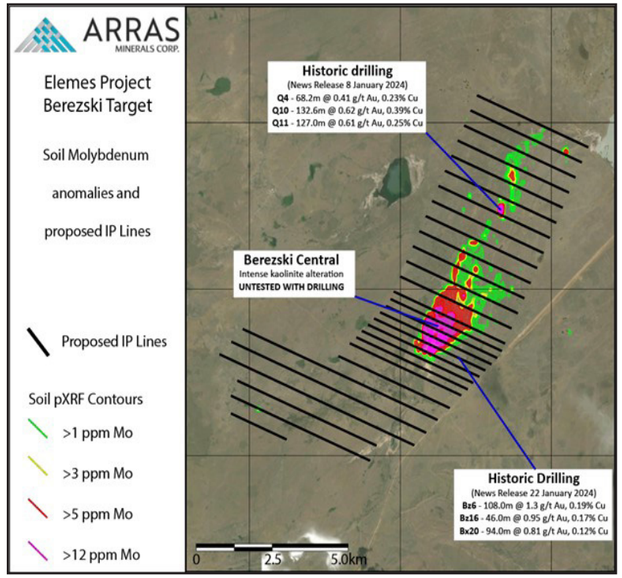
ARRAS Minerals

ARRAS drills 276 m of 0.58% CUEQ at Berezski North

September 8, 2025

High-grade intercept of 104 meters at 1.14% CuEq reported from surface at the Elemes Project in Kazakhstan.

Arras Minerals Corp. announced significant assay results from drillhole EL25016 at its Elemes Project in Kazakhstan, intersecting a broad 276-meter zone of copper-gold mineralization from surface. The results successfully extend the known mineralized zone at the Berezski North target, which remains open for expansion.



> ***"The results from Hole EL25016... intersected thick zones of high-grade copper-gold mineralization from surface." – Tim Barry, CEO, Arras Minerals***

Key Highlights

- Drillhole EL25016 at the Elemes Project intersected 276 meters of 0.58% copper-equivalent (CuEq) mineralization starting from the surface.
- The intercept included a higher-grade zone of 104 meters grading 1.14% CuEq, also from the surface.
- Results have defined a 600-meter mineralized trend at Berezski North that remains open for expansion.
- The company announced the appointment of Mr. Scott Heffernan to the Board of Directors, replacing Mr. Christian Milau.

Tim Barry
CEO and Director

Company Profile

- Focus: Copper & Gold Exploration and Development
- Jurisdiction: Northeastern Kazakhstan
- Flagship Project: Elemes Copper-Gold Porphyry Project
- Strategy: Advancing a large portfolio of copper and gold assets in Kazakhstan, supported by a strategic exploration alliance with Teck Resources.

Guanajuato Silver

Guanajuato Silverissues warrents related to C$18m financing

September 4, 2025

Proceeds from the financing to accelerate fleet upgrades, modernize facilities, and expand exploration.

Guanajuato Silver Company Ltd. has confirmed the issuance of 458,500 warrants to its advisor, Research Capital Corporation. The issuance is connected to the company's recently closed C$18 million financing, which will be used to upgrade equipment and expand exploration at its mines in Mexico.

> ***"The C$18 million...financing...positions the Company to accelerate underground fleet upgrades, modernize processing facilities, and significantly expand exploration programs."***
> ***– Guanajuato Silver Company Ltd.***

Key Highlights

- Guanajuato Silver (GSilver) has issued 458,500 non-transferrable advisor warrants to Research Capital Corporation.
- The warrants are connected to a recently closed C$18 million financing that has materially strengthened the company's balance sheet.
- Funds will be used for accelerating underground fleet upgrades, modernizing processing facilities, and significantly expanding exploration programs.
- Each warrant has an exercise price of $0.30 and is exercisable until August 21, 2028.

Guanajuato Silver CO LTD

James Anderson
Chairman & CEO

Company Profile

- Focus: Gold Exploration & Development
- Jurisdiction: Nevada, USA
- Flagship Project: Manhattan District Project
- Strategy: Consolidating a past-producing district with significant historical drilling and existing infrastructure (a 400 tpd mill) to define a large-scale resource.

Guanjuato Silver upgrades mining fleet at Mexican operations

September 24, 2025

Nine new vehicles, including trucks and scooptrams, are being deployed at the El Cubo and Valenciana mines to improve operating efficiencies and enhance production.

Guanajuato Silver is undertaking a significant upgrade of its mining fleet at its El Cubo and Valenciana mine complexes in Guanajuato, Mexico. A total of nine new vehicles are being integrated into operations, including six recently delivered low-profile trucks and scooptrams, with three more haulage trucks on order. The company expects the new fleet to materially impact production output by improving operational efficiencies.

Key Highlights

- U.S. Gold Corp. will attend the Mining Forum Americas 2025 Conference at the Broadmoor Hotel & Resort in Colorado Springs.
- Mr. George Bee is scheduled to provide an update on the company's projects on Tuesday, September 16, 2025.
- Management will participate in meetings with institutional investors, private equity firms, and hedge funds throughout the event.

> ***"Investing heavily in our mining fleet is the most effective way to generate improved operating efficiencies and enhanced production. The challenges of maintaining our existing fleet of maturing vehicles has often added variability to our production cycle; however, with these new state-of-the-art vehicle acquisitions, our operations will see enhanced fleet availability, which we expect to materially impact production output."***

Scorpio Gold Corp.

Scorpio Gold closes $8Million private placement

September 3, 2025

Funds to advance exploration and development at the flagship Manhattan District Project in Nevada.

Scorpio Gold Corporation (TSX-V: SGN) has closed a non-brokered private placement, successfully raising gross proceeds of $8,000,000. The financing consisted of 32,000,000 common shares issued at a price of $0.25 per share.

The placement saw participation from notable resource investors, including Ross Beaty ($4.4 million), Eric Sprott ($3.0 million), and four members of the Lumina Group ($600,000). The company plans to direct the net proceeds toward advancing exploration and development at its 100%-owned Manhattan District Project in Nevada. This project includes the past-producing Manhattan Mine and the Goldwedge Project, which features a 400-ton-per-day gravity mill. The financing is subject to final approval from the TSX Venture Exchange.

"The Company intends to use the net proceeds from the Financing to advance exploration and development activities at its flagship Manhattan District Project in Nevada..."
– Scorpio Gold Corporation

Key Highlights

- Scorpio Gold has closed a non-brokered private placement for gross proceeds of $8 million.
- The financing was subscribed to by prominent investors including Ross Beaty and Eric Sprott.
- Net proceeds will be used to advance the company's flagship Manhattan District Project in Nevada.
- The company issued 32,000,000 common shares at a price of $0.25 per share.

SCORPIO Gold Corporation

Zayn Kalyan
CEO & Director

Company Profile

- Focus: Gold Exploration & Development
- Jurisdiction: Nevada, USA
- Flagship Project: Manhattan District Project
- Strategy: Consolidating a district of past-producing mines with significant historical data to define a multi-million-ounce resource.

Scorpio Gold Corp. reports Maiden Resources of 74,000 ounces at Manhattan

September 11, 2025

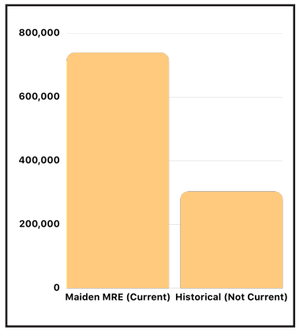
Initial estimate for the Nevada-based project includes 18.3 million tonnes grading 1.26 g/t gold in the inferred category.

Scorpio Gold Corporation (TSX-V: SGN) has announced the first modern mineral resource estimate for its consolidated, 100%-owned Manhattan District project in Nevada.

The maiden mineral resource estimate (MRE), which covers the Goldwedge and Manhattan Pit areas, reports an inferred resource of

740,000 ounces of contained gold. This is based on 18.34 million tonnes of material grading 1.26 g/t gold. The estimate, with an effective date of June 4, 2025, incorporates over 92,000 meters of historical drilling but does not yet include any results from Scorpio's ongoing 2025 drill program.

The company also reported a historical estimate for satellite deposits including Keystone and Black Mammoth, which totals an additional 303,949 ounces of gold, though this is not being treated as a current resource. Harrison Pokrandt, VP of Exploration, noted that the process of validating historical data has been valuable, uncovering highlights like a drill interval of 12.22 g/t gold over 70.1 metres in the Goldwedge target area.



Key Highlights

- Scorpio Gold announced a maiden inferred mineral resource of 740,000 ounces of gold at its Manhattan District project in Nevada.
- The estimate comprises 18.34 million tonnes grading 1.26 g/t gold and covers the Goldwedge and Manhattan Pit areas.
- The estimate is based on over 92,000 meters of historical drilling and does not yet include any of the company's 2025 drill results.
- A separate historical, non-current resource for satellite deposits totals an additional 303,949 ounces of gold.

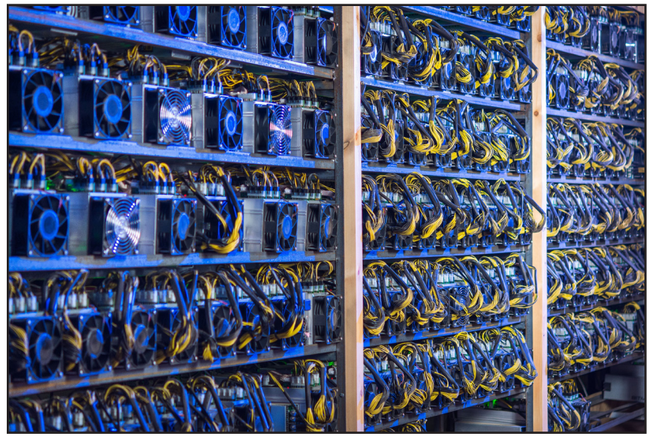
"The Maiden MRE represents the starting point for the newly consolidated 100%-owned Manhattan District... Scorpio Gold's objective is to build a multi-million-ounce resource at a grade that sets it apart from peers an objective we are well positioned to pursue..."
– Zayn Kalyan, CEO, Scorpio Gold

DigiPower X

Digi Power X pivots Alabama site to AI, reports August Bitcoin production

September 2 , 2025

Company ceases BTC mining in Alabama to build 40 MW AI data center campus while expanding overall Bitcoin and Ethereum holdings.



Digi Power X Inc. announced a major strategic pivot, ceasing Bitcoin mining at its Alabama site to redevelop it as a 40 MW AI data center campus. The company also reported its August 2025 operational results, highlighting a 37% increase in its Bitcoin holdings and a 93% increase in its Ethereum holdings.

> ***"Digi Power X has ceased BTC mining operations in Alabama, redeploying resources in that location toward AI infrastructure." – Digi Power X Inc.***

Key Highlights

- Digi Power X has ceased Bitcoin mining at its Alabama facility to convert it into a 40 MW AI data center campus.
- The company increased its Bitcoin holdings by 37% to 85 BTC and its Ethereum holdings by 93% to approximately 1,000 ETH in August.
- Miners at the company's facilities produced approximately 24 BTC during the month.
- A purchase order has been placed with Supermicro for NVIDIA B200-powered systems for the new AI venture.

DIGIPOWER X

Michel Amar
CEO

Company Profile

- Focus: AI Infrastructure & Energy-Efficient Modular Data Centers
- Jurisdiction: Global Distribution
- Flagship Product: ARMS (AI-Ready Modular Solution) Platform
- Strategy: Developing and manufacturing Tier 3-certified modular data centers purpose-built for AI, hyperscale, and blockchain workloads, delivered with rapid deployment timelines.

Digi Power X CEO outlines AI stratergy in shareholder letter

September 16, 2025

Company details deployment timeline for its Tier III certified ARMS 200 modular data center, with first pod commissioning targeted for December 2025.

Digi Power X CEO Michel Amar released a letter to shareholders detailing the company's accelerated transformation into an advanced AI infrastructure provider. The letter confirms that the first Tier III certified ARMS 200 modular data center is scheduled for delivery at the company's Alabama facility by the end of November 2025, with commissioning planned for December. This certification ensures 99.982% availability and enterprise-grade reliability for mission-critical AI workloads.

Following this initial 1 MW deployment, Digi Power X plans to expand its offerings to larger 5MW (ARMS 500) and 10MW (ARMS 1000) clusters. The company's business model will focus on two pillars: offering "GPU-as-a-Service" and selling turnkey cluster solutions. The letter also highlighted the company's strong asset position, with approximately $29.4 million in cash, deposits, and digital assets and no long-term debt.

Key Highlights

- CEO Michel Amar provided an update on the company's transformation towards AI infrastructure.
- The first Tier III certified ARMS 200 pod is scheduled for delivery in Alabama by the end of November 2025, with commissioning in December 2025.
- The company plans to expand its modular platform to 5MW (ARMS 500) and 10MW (ARMS 1000) clusters.
- As of the letter's date, the company holds approximately $29.4 million in cash, deposits, and digital assets with no long-term debt.

> ***"Achieving the ANSI/TIA-942 Tier 3 certification reinforces our commitment to building world-class, high-availability data centers... it's about giving our customers, investors and partners the assurance that our facilities meet the highest global standards of reliability, security, and performance." – Alec Amar, President, Digi Power X***

Arizona Gold & Silver

Arizona Gold & Silvercloses oversub-scribed private placement

September 12 , 2025

Company raises nearly CDN$2 million to fund further exploration of its Philadelphia Property in Mohave County, Arizona.

Arizona Gold & Silver has closed its oversubscribed private placement, raising nearly C$2 million. Proceeds from the financing will fund continued exploration of the company's flagship Philadelphia Property in Arizona and be used for general working capital.

> ***"The Company plans to use the proceeds of the Private Placement for further exploration of the Philadelphia Property in Mohave County, and for general working capital purposes."***

Key Highlights

- Arizona Gold has closed an oversubscribed non-brokered private placement for gross proceeds of CDN$1,999,924.80.
- The company issued 6,666,416 units at a price of $0.30 per unit.
- Each unit consists of one share and one warrant, with each warrant exercisable at $0.40 for three years.
- Proceeds will be used for exploration at the Philadelphia Property and for general working capital.

ARIZONA GOLD & SILVER INC.

Mike Stark
President, CEO, and Director

Company Profile

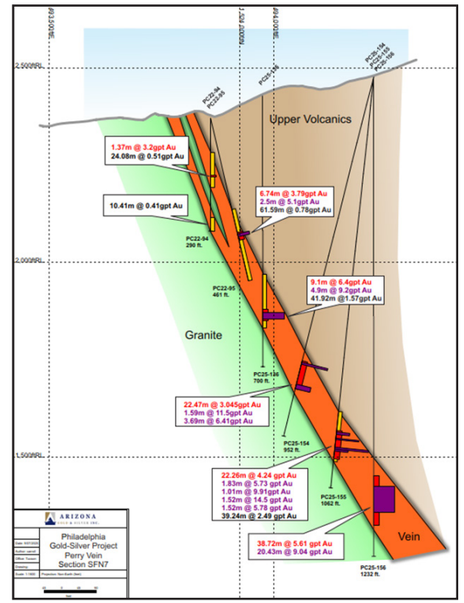
- Focus: Gold & Silver Exploration
- Jurisdiction: Arizona & Nevada, USA
- Flagship Project: Philadelphia Property (Arizona)
- Strategy: Systematically exploring high-potential, district-scale gold and silver projects in mining-friendly U.S. jurisdictions.

Arizona Gold & Silver announces option grants

September 15, 2025

Company to grant over 2.2 million incentive stock options to officers, directors, and consultants, exercisable at $0.37 per share.

Arizona Gold & Silver Inc. has announced that, subject to TSX Venture Exchange approval, it has granted incentive stock options to purchase 2,222,481 common shares. The options are being granted to the company's officers, directors, and certain consultants as per its stock option plan. The options will vest immediately and have an exercise price of $0.37 per share for a five-year period. The company stated it is pleased to offer these options to its dedicated team members who have demonstrated leadership and excellence.



Key Highlights

- Arizona Gold has granted incentive stock options to purchase a total of 2,222,481 common shares.
- The options were granted to officers, directors, and certain consultants of the company.
- The exercise price is set at $0.37 per share.
- The options have a five-year term and will vest immediately.

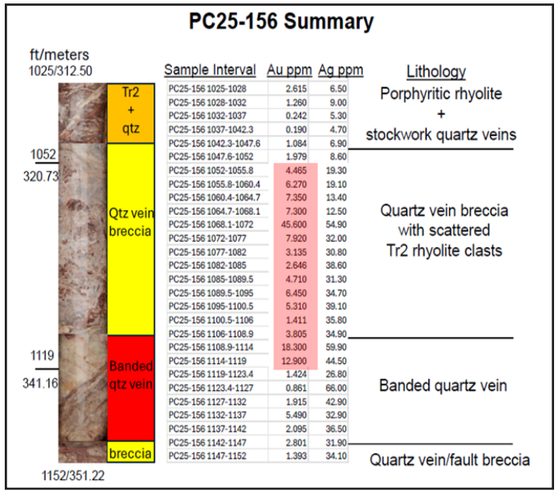
> ***"Arizona Gold & Silver Inc. is pleased to offer these options to our dedicated team who have demonstrated leadership and excellence in their individual areas."***

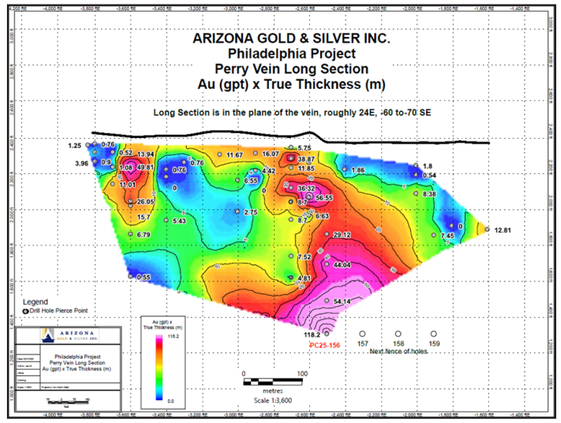
Arizona Gold & Silver intersects deep, high-grade mineralization

September 17, 2025

Drilling at the Philadelphia Project returns 9.04 g/t gold and 34 g/t silver over 20.43 meters, confirming that the vein system increases in thickness and grade with depth.

Arizona Gold & Silver has announced very positive assay results from its ongoing drilling at the Philadelphia Project in Arizona. Drill hole PC25-156 returned the thickest and highest-grade gold-silver intercept to date, with 9.04 g/t gold and 34 g/t silver over 20.43 meters.





The results confirm that the Perry Vein system is a large deposit that increases in both thickness and grade with depth. With fine-grained visible gold seen in the core, the company plans to continue drilling with three more holes to test the strike extension before an expanded exploration program in 2026.

Key Highlights

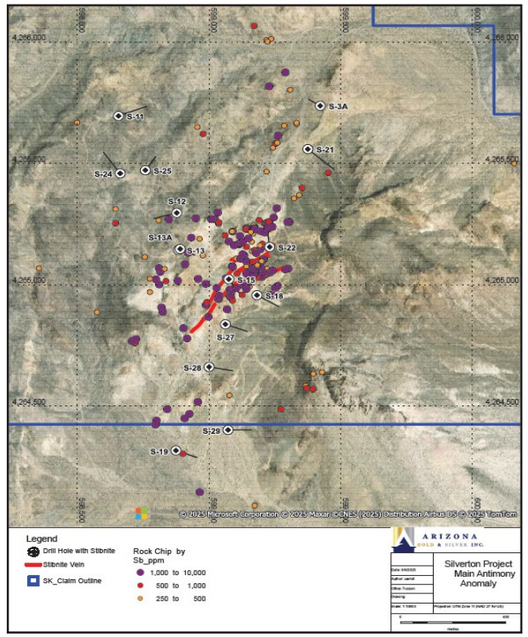
- Drill hole PC25-156 has returned the highest-grade and thickest intercept to date at the Philadelphia Project in Arizona.
- The main intercept returned 9.04 g/t Au and 34.0 g/t Ag over 20.43 m from a depth of 320.73 m.
- This was part of a broader mineralized zone of 5.61 g/t Au and 29.2 g/t Ag over 38.72 m.
- The company is planning three additional holes to test for further expansion and has submitted an amendment to expand its exploration area for 2026.

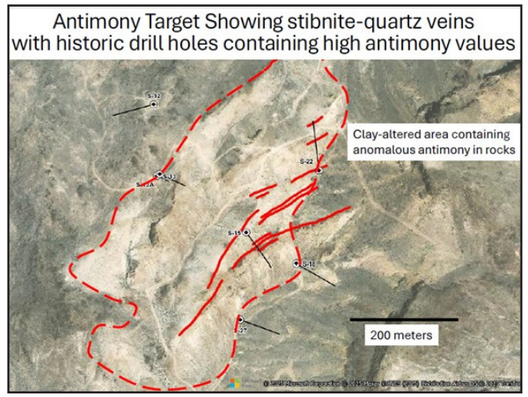
"These outstanding results validate our belief in the untapped potential at depth within the Perry Vein system. With consistent high-grade intercepts and visible gold in core, we are seeing increasing scale and grade as we drill deeper."– Mike Stark, President and CEO, Arizona Gold & Silver Inc.

Arizona Gold & Silver announces exploration plan for silvertron project

September 24, 2025

Company to advance the Nevada-based gold-antimony project after receiving drill permits and will entertain joint venture proposals to test the critical mineral potential.





The company has received approval for a 27-hole RC drill program to test a +900 meter by 400 meter zone of quartz-stibnite veins and a nearby geophysical target. While the program is permitted, the company's current plan is to seek a joint venture partner to fund the work, allowing Arizona Gold to focus on its flagship Philadelphia project.

Arizona Gold & Silver Inc. has announced its plan to advance the Silverton gold-antimony project in Nevada, re-assessing its potential due to the high price of antimony, a designated US critical mineral. The property contains significant historical data, including surface samples grading over 1% antimony and a historic drill hole that intersected 20 feet of +1% antimony.

Key Highlights

- Arizona Gold & Silver has announced plans to advance its Silverton gold-antimony project in Nye County, Nevada.
- The company is re-assessing the property's potential for antimony, a designated critical mineral trading at US$57.50/lb.
- Historical data includes over 25 surface samples with greater than 1% antimony, and a historic drill hole that intersected 20 feet at over 1% antimony.
- A 27-hole RC drill program has been permitted by the US Bureau of Land Management to test the antimony-gold veins and a nearby MT anomaly.

"The potential is high for a near-surface deposit of antimony, composed of high-grade veins such as what was hit in historic hole S-18 and surrounding stockwork of antimony veinlets. This is an easy target to test with shallow drill holes."

TRU Precious Metals Corp.

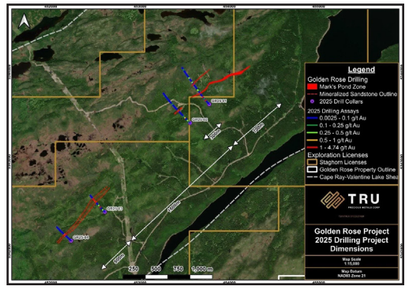
TRU intersects gold in all holes at golden rose project

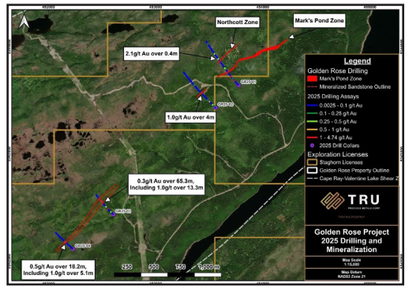
September 10, 2025

Drill program discovers new 500-meter-long mineralized sandstone unit and confirms continuity of Northcott zone at depth.

TRU Precious Metals Corp. announced positive results from its 2025 diamond drilling program at the Golden Rose Project, with all four holes intersecting gold mineralization. The program successfully identified a previously unknown, broad mineralized sandstone unit and confirmed the depth potential of the high-grade Northcott zone.

> ***"I am very pleased to be reporting upon the results achieved in our investigative 2025 drilling program which exceeded expectations with all 4 holes intersecting gold-bearing mineralization." – Steve Nicol, CEO, TRU Precious Metals***





Key Highlights

- A four-hole, 1,988-meter drill program intersected gold-bearing mineralization in every hole.
- A new mineralized sandstone unit was discovered, with intercepts including 1.0 g/t Au over 13.3m in hole GR 25-03 and 1.0 g/t Au over 5.1m in hole GR 25-04.
- The new sandstone unit has an interpreted minimum strike length of 500m and remains open.
- Drilling confirmed the vertical continuity of the Northcott zone to a depth of 240m.

Steve Nicol
CEO, Director, Chair of the Technical Committee

Company Profile

- Focus: Gold & Copper Exploration
- Jurisdiction: Newfoundland, Canada
- Flagship Project: Golden Rose Project
- Strategy: Exploring a large, regional-scale land package along a proven gold-bearing trend between two major gold deposits, with a strategic earn-in agreement with Eldorado Gold.

Phenom Resources

Phenom anounces up to $704,000 private placement

September 12, 2025

Financing proceeds to fund work programs on the company's Nevada-based exploration properties and for general working capital.

Phenom Resources Corp. has announced a proposed non-brokered private placement to raise up to $704,000. The financing, structured as units containing a share and a four-year warrant, will fund work programs on the company's Nevada exploration properties and provide general working capital.

> ***"I am very pleased to be reporting upon the results achieved in our investigative 2025 drilling program which exceeded expectations with all 4 holes intersecting gold-bearing mineralization." – Steve Nicol, CEO, TRU Precious Metals***

Key Highlights

- Phenom proposes a non-brokered private placement to raise gross proceeds of up to $704,000.
- The offering consists of up to 4,400,000 units at a price of $0.16 per unit.
- Each unit includes one common share and one purchase warrant, exercisable at $0.22 for four years.
- Proceeds are designated for exploration work on the company's properties and for general working capital.

Paul Cowley
President & CEO, Director

Company Profile

- Focus: Gold & Vanadium Exploration
- Jurisdiction: Nevada, USA
- Flagship Project: Carlin Gold-Vanadium Project
- Strategy: Advancing North America's largest, highest-grade primary vanadium resource while exploring for Carlin-type and high-grade vein-type gold targets.

Phenom resumes drilling at Crescent Vally project

September 16, 2025

Drill program to test two high-potential targets: bonanza-grade gold veins and an Iron Oxide Copper Gold (IOCG) system with rare earth elements.

Phenom Resources Corp. has announced the resumption of drilling at its Crescent Valley Gold Project, located near the Carlin Gold Trend in Nevada. The program is designed to test two distinct and highly prospective discovery opportunities. The first is a low sulfidation, bonanza-vein-type gold system characterized by a large quartz vein system, which will be tested with one drill hole.

The second opportunity is an Iron Oxide Copper Gold (IOCG) system, which also shows potential for valuable rare earth metals. A second drill hole will test what is interpreted to be the feeder zone of this system. During drill pad construction for this hole, a 75-meter zone of IOCG breccia was exposed. Chip sampling confirmed elevated levels of at least 15 rare earth elements, including valuable magnet metals like neodymium and dysprosium.

Key Highlights

- Phenom has resumed drilling at its Crescent Valley Gold Project in Nevada.
- The program will test two distinct targets: a bonanza-vein gold system and an Iron Oxide Copper Gold (IOCG) system.
- The IOCG target is also prospective for valuable rare earth elements (REEs), including those used in magnets for EVs and wind turbines.
- A 75-meter zone of IOCG breccia was exposed and chip-sampled on the drill pad, showing elevated levels of at least 15 REEs.

"Crescent Valley Gold Project hosts two exceptional discovery opportunities for us, low sulfidation, bonanza-vein-type gold opportunities and an Iron oxide copper gold opportunity (IOCG) with appreciable rare earth metals." – Dave Mathewson, Director & Geological Advisor, Phenom Resources

Noble Plains Uranium Corp.

Noble Plains announces upto $900,000 private placement

September 17, 2025

Financing proceeds to fund exploration on the company's uranium projects in Wyoming's Powder River and Shirley Basins.

Noble Plains Uranium Corp. has announced a non-brokered private placement to raise up to $900,000 to fund its exploration activities. The proceeds will be used for exploration on the company's Duck Creek and Shirley Central uranium projects in Wyoming's prolific basins.

"The Company expects to use the proceeds of the Offering to carry out exploration work on the Company's Duck Creek and Shirley Central uranium projects located in the prolific Powder River Basin and past producing Shirley Basin of Wyoming, as well as for general working capital purposes." – Noble Plains Uranium Corp.

Key Highlights

- Noble Plains has announced a non-brokered private placement to raise gross proceeds of up to $900,000.
- The offering consists of up to 10,000,000 units at a price of $0.09 per unit.
- Each unit includes one common share and one-half of a purchase warrant, with each whole warrant exercisable at $0.15 for two years.
- Proceeds are designated for exploration work on the Duck Creek and Shirley Central uranium projects in Wyoming.

Paul Cowley
President & CEO, Director

Company Profile

- Focus: U.S. Uranium Exploration & Development
- Jurisdiction: United States (Wyoming)
- Key Projects: Duck Creek & Shirley Central Projects
- Strategy: Advancing a portfolio of U.S.-based uranium projects amenable to In-Situ Recovery (ISR) with the objective of rapidly delineating resources.

Noble Plains increases private placement to over $1 millon

September 18, 2025

Company increases size of previously announced financing to $1,040,040 due to strong investor demand.

Noble Plains Uranium Corp. has announced that due to strong investor demand, it has increased the size of its non-brokered private placement originally announced on September 17, 2025. The company will now offer up to 11,556,000 units at a price of $0.09 per unit, for total gross proceeds of up to $1,040,040.

The structure of each unit remains unchanged, comprising one common share and one-half of one common share purchase warrant. Each whole warrant is still exercisable at $0.15 for a two-year period. All other terms of the financing, including the intended use of proceeds for exploration on its Wyoming uranium projects, remain the same. The offering is subject to final acceptance by the TSX Venture Exchange.

Key Highlights

- Due to strong investor demand, Noble Plains has increased the size of its private placement to $1,040,040.
- The company will now issue up to 11,556,000 units at a price of $0.09 per unit.
- Each unit still includes one common share and one-half of a purchase warrant.
- All other terms of the financing, including the warrant's $0.15 exercise price and two-year term, remain unchanged.

"The Company expects to use the proceeds of the Offering to carry out exploration work on the Company's Duck Creek and Shirley Central uranium projects located in the prolific Powder River Basin and past producing Shirley Basin of Wyoming, as well as for general working capital purposes." – Noble Plains Uranium Corp.

Noble Plains increases private placement to over $1,049,725

September 26, 2025

Non-brokered financing is increased for a second time to a new total, with the company now set to issue up to 11,663,611 units.

Noble Plains Uranium Corp. is pleased to announce a further increase of 107,611 units to its non-brokered private placement, which was previously announced on September 17 and upsized on September 18. The company cites strong investor demand for the change.

The financing will now consist of up to 11,663,611 units at a price of $0.09 per unit, for total gross proceeds of up to $1,049,725. All other terms of the offering, including the unit structure and warrant details, remain the same, with the placement still subject to regulatory approval.

Key Highlights

- Noble Plains has announced a further increase to its non-brokered private placement.
- The offering will now consist of up to 11,663,611 units at a price of $0.09 per unit.
- The total gross proceeds the company aims to raise is now up to $1,049,725.
- All other terms of the offering, including the unit structure (one share and one-half warrant) and warrant terms (exercisable at $0.15 for two years), remain unchanged.

"Noble Plains Uranium Corp. (TSX-V: NOBL, FSE: INEO) ("Noble Plains" or the "Company") is pleased to announce a further increase of 107,611 units to its non-brokered private placement previously announced on September 17, 2025 and upsized on September 18, 2025."

Loyalist Exploration

Loyalist Exploration closes financing and debt settlement

September 3, 2025

Company closes final $78,000 tranche of a $408,000 financing and settles over $110,000 in debt through shares-for-debt transactions.

Loyalist Exploration has closed the final $78,000 tranche of its private placement, for a total of $408,000 raised. Concurrently, the company settled $110,283 in outstanding debt by issuing shares, preserving cash for working capital and corporate purposes.

> ***"The Board of Directors of the Company determined that the Shares for Debt Transaction is in the best interests of the Company in that it preserves cash and with the settlement, it helps to align the individuals with the Company's shareholders."***

Key Highlights

- Loyalist has closed the final $78,000 tranche of its private placement, bringing the total raised to $408,000.
- The company also completed a shares-for-debt transaction, settling $110,283 of outstanding debt.
- In both transactions, units were priced at $0.01 and included one share and one warrant, exercisable at $0.05 for three years.
- The company continues due diligence on the Tully project and plans to close the acquisition by September 30, 2025.

LOYALIST EXPLORATION

Errol Farr
President and CEO

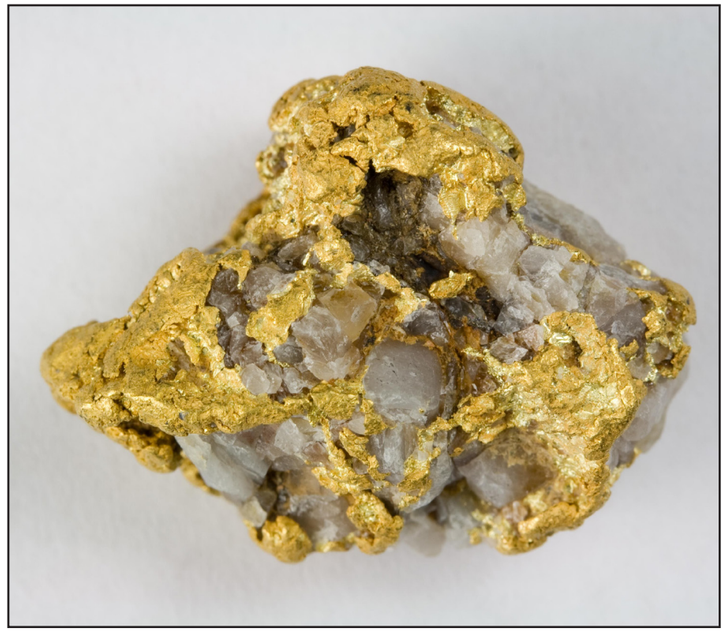
Company Profile

- Focus: Mineral Exploration
- Jurisdiction: Canada (Timmins, Ontario)
- Key Projects: Loveland property, Gold Rush property
- Strategy: Concentrating on acquiring, exploring, and developing quality mineral properties in Canada, with a current focus on the Timmins mining district.

Loyalist announces private placement to aquire tully Gold project

September 19, 2025

Company to raise up to $700,000 to fund the acquisition of the Tully Property, a property payment for the Gold Rush Property, and for exploration expenditures.



Loyalist Exploration Limited has announced a non-brokered private placement to raise up to $700,000 through the sale of 35,000,000 units at $0.02 each. The financing is a key part of the company's "Buy Timmins" strategy and is timed to support the acquisition of the Tully Gold Project, scheduled to close on September 30, 2025.

Each unit will consist of one common share and one warrant, exercisable at $0.05 for 48 months. In addition to funding the Tully acquisition, proceeds will also be used for a payment on the Gold Rush Property, exploration expenditures, and general working capital.

Key Highlights

- Loyalist has announced a non-brokered private placement to raise gross proceeds of up to $700,000.
- The offering consists of up to 35,000,000 units at a price of $0.02 per unit.
- Each unit includes one common share and one purchase warrant, exercisable at $0.05 for 48 months (4 years).
- Proceeds will be used for the Tully Property acquisition, the Gold Rush Property payment, and exploration expenditures.

> ***"We are very encouraged by the strong investor response to our 'Buy Timmins' strategy, which continues with the potential acquisition of the Tully deposit... and its significant historical gold resource. The closing is scheduled for September 30, 2025, Tully is well recognized for its numerous high-grade gold drill intersections, and we believe there is considerable upside potential remaining on the project."***

Loyalist provides update on tully Gold project acquisition

September 30, 2025

Company intends to complete the acquisition on or about October 2, 2025, and will seek shareholder approval due to the dilutive nature of the transaction.

Loyalist Exploration announced it intends to complete the acquisition of the Tully Gold Project, located in the Timmins, Ontario gold camp, on or about October 2, 2025. As part of the transaction, the company expects to issue approximately 114,256,278 common shares to the project's vendor.

Due to the number of shares being issued, the company's total dilution in 2025 is expected to exceed 100%. Consequently, the acquisition is subject to shareholder approval, which Loyalist intends to obtain via written consent from a majority of its shareholders, in addition to all necessary regulatory approvals.

Key Highlights

- Loyalist intends to complete its previously announced acquisition of the Tully Gold Project on or about October 2, 2025.
- The company may issue up to approximately 114,256,278 common shares to the vendor as part of the acquisition.
- The total dilution from the acquisition and other 2025 share issuances is expected to exceed 100%.
- Due to the significant dilution, the acquisition is subject to shareholder approval, which the company will seek by written consent.

"Consequently, in accordance with the policies of the Canadian Securities Exchange, the Acquisition is subject to shareholder approval, which Loyalist intends to obtain by written consent of its 50% plus one of its shareholders."

Gold Hunter Resources

Gold Hunter completes project-wide airborne survey

September 9, 2025

First modern geophysical dataset to cover the entire 40 km strike length of the Great Northern Project in Newfoundland, mapping structures coincident with known gold mineralization.

Gold Hunter Resources Inc. has successfully completed a comprehensive airborne geophysical survey over its entire 26,237-hectare Great Northern Project in Newfoundland. This is the first modern survey to cover the full strike length of the property, and preliminary data is already helping to define structural controls on known gold mineralization, which will be used to generate targets for a maiden drill program.

"Completion of the airborne survey is a major milestone, giving us a unified dataset over our entire 50-kilometre-long project for the first time. This new geophysical data is a valuable layer we need to effectively target the high-grade potential we know exists here." – Sean A. Kingsley, President & CEO, Gold Hunter Resources

Key Highlights

- Gold Hunter has successfully completed the first-ever comprehensive airborne VTEM™ and Magnetic survey over its entire 26,237-hectare Great Northern Project.
- Preliminary data has confirmed major property-scale structures and shows a strong spatial correlation with the project's five key gold areas.
- The new data will be integrated with historical information to refine high-priority targets for the company's maiden drill program.
- The project hosts a historical estimate of 255,000 oz Au at the Rattling Brook deposit and an indicated resource of 51,000 oz Au at the Viking deposit.

Sean A. Kingsley
President & CEO, Director

Company Profile

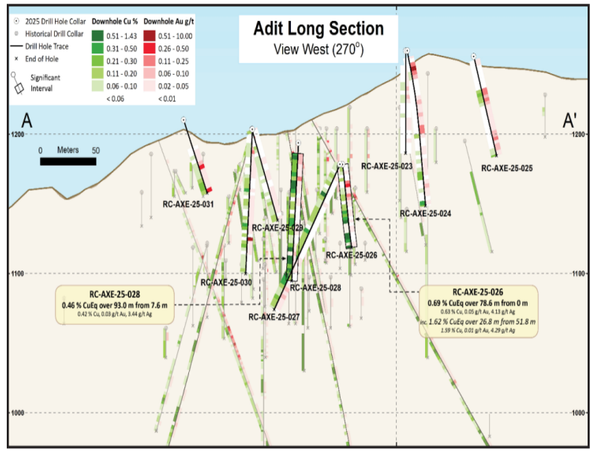
- Focus: Precious & Base Metal Exploration
- Jurisdiction: Newfoundland, Canada
- Flagship Project: Great Northern Project
- Strategy: Employing a data-driven approach by merging modern techniques with historical data to unlock district-scale opportunities.

Kodiak Copper Corp.

Kodiak drills high-grade mineralization from surface at Adit zone

September 2, 2025

Assays include 79m of 0.69% CuEq, ending in a higher-grade zone of 27m of 1.62% CuEq at the MPD Project in British Columbia.



Kodiak Copper Corp. has announced new drill results from its MPD copper-gold porphyry project in British Columbia. The results from nine RC holes at the Adit Zone confirmed shallow, high-grade mineralization, including a highlight intercept of 78.6m of 0.69% CuEq that ended in mineralization.

Key Highlights

- Recent drilling at the Adit Zone has confirmed shallow, high-grade copper-gold mineralization at the MPD Project.
- Hole RC-AXE-25-026 intersected 78.6m of 0.69% CuEq from surface, ending in a high-grade zone of 26.8m of 1.62% CuEq.
- Hole RC-AXE-25-028 intersected 93m of 0.46% CuEq, also ending in mineralization.
- The drill data will be used to support an initial Mineral Resource Estimate (MRE) for the MPD Project, planned for Q4 2025.

"The Adit Zone continues to deliver excellent grades close to surface as we advance and grow the MPD project. With our drilling to date, we were able to significantly extend the historic mineralized envelope at the Adit Zone and it is still open in multiple directions..."– Claudia Tornquist, President and CEO, Kodiak Copper

KODIAK COPPER

Claudia Tornquist
President and CEO, Director

Company Profile

- Focus: Copper Porphyry Exploration
- Jurisdiction: Canada & USA (British Columbia)
- Flagship Project: MPD Copper-Gold Porphyry Project
- Strategy: Systematically exploring historically drilled projects with known discoveries to outline large-scale, district-sized copper porphyry deposits.

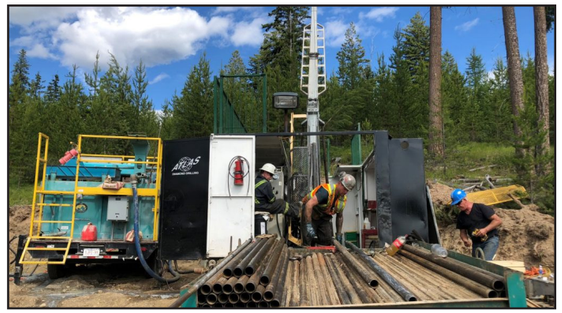
Kodiak Copper announces $7 Million "Bought Deal" financing

September 2, 2025

Private placement led by Canaccord Genuity to fund exploration at the MPD Project in British Columbia and advance the company's Arizona project.

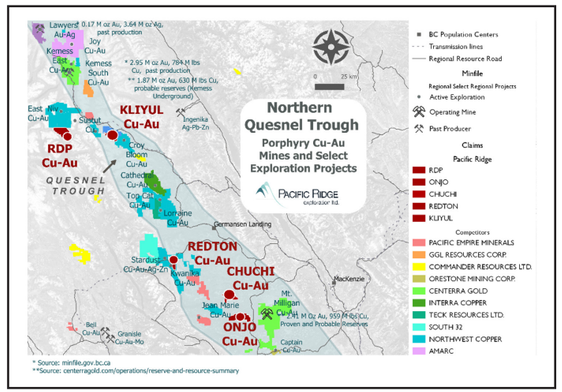
Kodiak Copper Corp. has announced a "bought deal" private placement, led by Canaccord Genuity Corp., for aggregate gross proceeds of approximately $7 million. The offering is comprised of two parts: $5 million from the sale of charity flow-through (FT) units at $1.00 each, and approximately $2 million from the sale of hard dollar (HD) units at $0.62 each. Each unit in both tranches will consist of one common share and one-half of one purchase warrant.

Each whole warrant is exercisable at $0.95 for 24 months. The gross proceeds from the flow-through units will be used for eligible "Canadian exploration expenses" on the company's projects in British Columbia, while the net proceeds from the hard dollar units will be used for working capital and to advance its project in Arizona. The offering is expected to close on or about September 25, 2025.



Key Highlights

- Kodiak Copper has entered into a "bought deal" private placement agreement with Canaccord Genuity for gross proceeds of approximately $7 million.
- The offering includes $5 million in charity flow-through units and ~$2 million in hard dollar units.
- Flow-through proceeds will fund exploration on the company's British Columbia projects, while hard dollar proceeds will be used for its Arizona project and working capital.
- Each unit includes one share and a half-warrant, with each whole warrant exercisable at $0.95 for 24 months.



"The net proceeds from the issue of the HD Units will be used for working capital... and the advancement of the Company's project in Arizona. The Company will use... the gross proceeds received... from the sale of the Charity FT Units... to incur eligible 'Canadian exploration expenses'... related to the Company's projects in British Columbia..." – Kodiak Copper Corp.

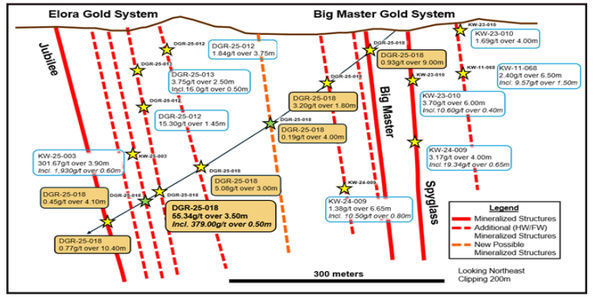
Dryden Gold Corp.

Dryden Gold intercepts 55.34 g/t over 3.5 meters

September 5, 2025

"Gap Hole" at Gold Rock Target includes a bonanza-grade interval of 379.00 g/t gold over 0.50 meters and confirms nine stacked mineralized structures.

Dryden Gold Corp. has reported significant results from hole DGR-25-018, the "Gap Hole," at its Gold Rock Project. The hole successfully intersected nine stacked gold structures over a 540-meter length, including a high-grade intercept of 55.34 g/t gold over 3.50 meters. These results confirm a much wider and more robust mineralized system between the known Big Master and Elora Gold Systems.



"We are very pleased with these exciting results from the Gap Hole. This hole confirms 9 gold mineralized structures and begins to show our shareholders a much fuller picture of what Dryden Gold is building in the Gold Rock Target Area." - Trey Wasser, CEO, Dryden Gold Corp.

Key Highlights

- Dryden Gold's "Gap Hole" (DGR-25-018) intersected nine stacked gold mineralized structures at its Gold Rock Project.
- A high-grade intercept returned 55.34 g/t gold over 3.50 meters, including a bonanza-grade zone of 379.00 g/t gold over 0.50 meters.
- A near-surface intercept at the Big Master target returned 0.93 g/t gold over 9.00 meters.
- The hole was designed to test the 430-meter area between the Big Master and Elora Gold Systems.

DRYDEN
GOLD CORP

Claudia Tornquist
President and CEO, Director

Company Profile

- Focus: High-Grade Gold Discovery
- Jurisdiction: Northwestern Ontario, Canada
- Flagship Property: Dryden District land package
- Strategy: Exploring a dominant, strategic land position that includes historic gold mines but has seen limited modern exploration, focusing on high-grade gold mineralization over 50km of potential strike length.

Dryden Gold extends marketing with Bunt Capital

September 16, 2025

Agreement includes a monthly fee and the grant of 200,000 stock options to the junior mining-focused marketing and consulting firm.

Dryden Gold Corp. has announced the extension of its engagement with Bunt Capital Corporation, a marketing and consulting firm focused on the junior mining sector. The agreement, which is subject to TSX Venture Exchange approval, is set for a 12-month term to assist with investor relations and corporate marketing efforts.

Under the terms, Dryden Gold will pay Bunt a fee of $15,000 per month and has granted 200,000 stock options. These options are exercisable at $0.355 for a five-year period and will vest quarterly over the first year of the engagement.

Key Highlights

- Dryden Gold has extended its marketing and consulting services agreement with Bunt Capital Corporation for a 12-month term.
- Under the terms, Dryden Gold will pay Bunt $15,000 per month and grant a total of 200,000 stock options.
- The options are exercisable at a price of $0.355 for five years and will vest quarterly over one year.
- Bunt Capital will communicate directly with existing shareholders, analysts, and prospective investors.

"The net proceeds from the issue of the HD Units will be used for working capital... and the advancement of the Company's project in Arizona. The Company will use... the gross proceeds received... from the sale of the Charity FT Units... to incur eligible 'Canadian exploration expenses'... related to the Company's projects in British Columbia..." – Kodiak Copper Corp.

Aurion Resources

Aurion closes C$9.3 Million strategic investment

September 4, 2025

Non-brokered private placement gives a single strategic investor a 6.88% stake in the company, with proceeds to advance the Risti Project in Finland.

Aurion Resources has announced the closing of a significant non-brokered private placement, raising C$9,290,400 from a single strategic investor. The deal gives the investor a 6.88% non-diluted ownership stake and includes an investor rights agreement, granting them the right to maintain their pro rata ownership in future financings.

At least 75% of the net proceeds from the 11,060,000-unit offering are earmarked for exploration and technical work on the company's 100% owned Risti project. Each unit was priced at C0.84 and include done common share and one–half of a three–year warrant, exercisable at C1.08.

"At least 75% of the net proceeds of the Offering will be used to advance exploration and technical work programs on the Company's 100% owned Risti project."

Key Highlights

- Aurion has closed a C$9.3 million non-brokered private placement with a single strategic investor.
- The investor subscribed for 11,060,000 units at C$0.84 per unit, resulting in a 6.88% ownership stake.
- Each unit includes one common share and one-half of a purchase warrant, with each whole warrant exercisable at C$1.08 for three years.
- At least 75% of the net proceeds will be used to advance exploration on the company's 100% owned Risti project

Matti Talikka
CEO, Director

Company Profile

- Focus: Early-Stage Precious Metals Exploration
- Jurisdiction: Finland
- Flagship Project: Risti Project
- Strategy: Generating or acquiring early-stage gold opportunities and advancing them through direct exploration or partnerships with major companies like B2Gold and Kinross Gold.

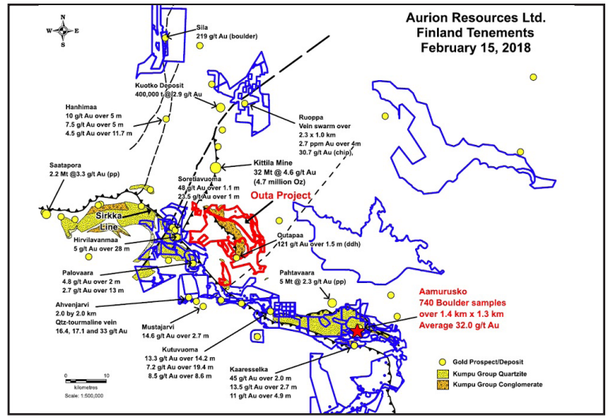
Aurion announces private placement for Kinross to maintain ownwership

September 5, 2025

Kinross to subscribe for 885,000 units at C$0.84 to maintain its 9.99% partially diluted stake following a recent strategic investment.

Aurion Resources has announced a non-brokered private placement allowing major shareholder Kinross Gold Corporation to maintain its ownership position. The move follows the closing of a C$9.3 million financing with a new strategic investor and sees Kinross exercising its pro rata right.

Kinross is expected to purchase 885,000 units at C0.84each, raising C743,400 to maintain a 9.99% partially diluted stake. The proceeds are planned for exploration at the Risti Project in Finland. The new strategic investor also has a right to top-up its position.

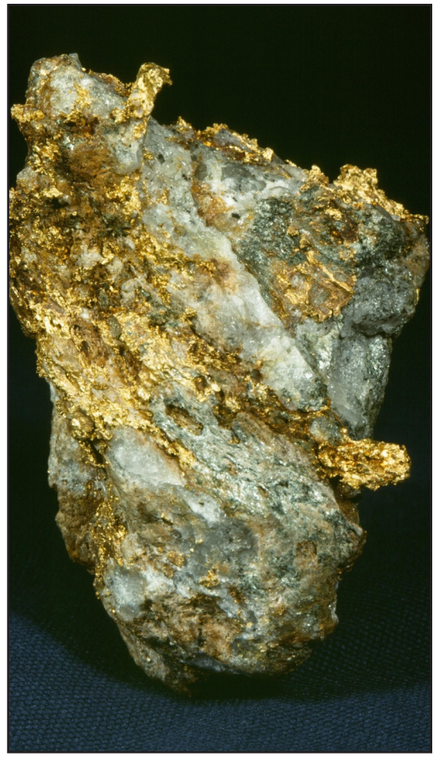


Key Highlights

- Aurion has announced a non-brokered private placement for Kinross Gold Corporation to maintain its pro rata ownership.
- Kinross will purchase 885,000 units at C$0.84 for total proceeds of C$743,400.
- The placement will result in Kinross holding 9.99% of Aurion on a partially diluted basis.
- Proceeds will be used to advance the flagship Risti Project in Finland.

"Kinross has the right to maintain its pro rata share interest in the Company for so long as it owns at least 5% of the issued and outstanding Common Shares of the Company from time to time."

Aurion extends mineralized system to 1.4 km at Risti property



September 8, 2025

Drilling at the Vanha prospect extends the gold system by 300 meters, with intercepts including 1.07 g/t Au over 9.20 m and 0.88 g/t Au over 20.30 m.

Aurion Resources has announced results for seven new drill holes at the Kaaresselkä area of its wholly-owned Risti property in northern Finland. The drilling successfully extended the gold mineralized system at the Vanha prospect by 300 meters to the west, bringing the total defined strike length to 1.4 kilometers.

The near-surface intercepts confirm the system is open for expansion, with highlights including 1.07 g/t Au over 9.20 m in hole KS25116 and 0.88 g/t Au over 20.30 m in hole KS25115. According to the company, the ongoing drill program continues to test for further strike extensions and higher-grade mineralization.

Key Highlights

- Aurion has extended the gold mineralized system at the Vanha prospect by 300 meters to a total strike length of 1.4 kilometers.
- New drill results include 1.07 g/t Au over 9.20 m and 1.20 g/t Au over 10.85 m in hole KS25116.
- Another significant intercept returned 0.88 g/t Au over 20.30 m, including a higher-grade zone of 2.01 g/t Au over 4.15 m.
- The mineralized system has been intersected down to 250 m depth and remains open in multiple directions.

"Aurion's spring drilling program extended the gold mineralized system to 1,400 m along strike and to 250 m depth at the Vanha prospect (Kaaresselkä area). Significant widths of higher-grade mineralization were also discovered. The Vanha mineralized system is growing impressively. – Matti Talikka, CEO, Aurion Resources

Aurion completes private placement with Kinross

September 19, 2025

Financing allows Kinross Gold Corporation to maintain its 9.99% partially diluted ownership position in the company, with proceeds to advance the Risti Project in Finland.

Aurion Resources has announced the completion of its non-brokered private placement with major shareholder Kinross Gold Corporation. Under the placement, Aurion issued 885,000 units at a price of C0.84 perunit, for total gross proceeds of C743,400.

The financing was conducted to allow Kinross to maintain its pro rata ownership interest following a separate strategic investment by another party. With the closing, Kinross holds approximately 9.99% of Aurion on a partially diluted basis. Proceeds will be used for exploration at the Risti Project in Finland.

Key Highlights

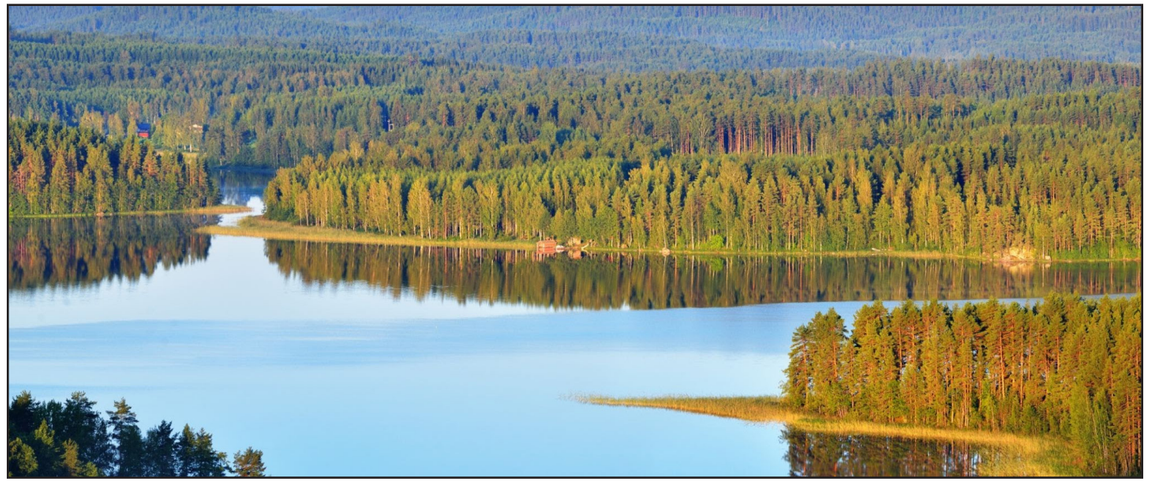
- Aurion has completed its previously announced non-brokered private placement with Kinross Gold Corporation.
- The placement consisted of 885,000 units at C$0.84 per unit for total gross proceeds of C$743,400.
- The financing allows Kinross to maintain its ownership position of 9.99% on a partially diluted basis.
- Proceeds will be used for the exploration and advancement of the Company's flagship Risti Project in Finland.

"Kinross has the right to maintain its pro rata share interest in the Company for so long as it owns at least 5% of the issued and outstanding Common Shares of the Company from time to time."

Aurion announces stock option grants

September 22, 2025

Company grants 1,375,000 options to directors, officers, employees, and consultants exercisable at $1.10 per share.



Aurion Resources has announced that its Board of Directors has authorized the granting of stock options under the company's Stock Option Plan. The options will allow for the purchase of a total of 1,375,000 common shares of the company.

The options are being granted to certain directors, officers, employees, and consultants of Aurion. They feature an exercise price of $1.10 per share and are valid for a five-year term, set to expire on September 22, 2030.

Key Highlights

- Aurion has granted stock options to purchase 1,375,000 common shares of the company.
- The options were granted to certain directors, officers, employees, and consultants.
- The exercise price is set at $1.10 per share.
- The options have a five-year term, expiring on September 22, 2030.

"The Board of Directors of the Company has authorized the granting of stock options under its Stock Option Plan to purchase 1,375,000 common shares of the Company at an exercise price of $1.10 per share for a five-year term expiring September 22, 2030."

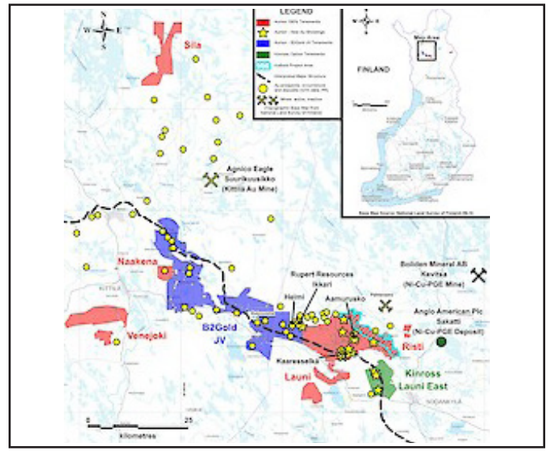
Aurion completes private placement with Kinross

September 24, 2025

Financing allows Kinross Gold Corporation to maintain its 9.99% partially diluted ownership position in the company, with proceeds to advance the Risti Project in Finland.

Aurion Resources has announced that its partner, KoBold Metals Company, has commenced exploration activities on a ~35 km² section of Aurion's Risti property in northern Finland. The program involves extensive base of till and bedrock chip sampling, a key exploration method for discovering critical minerals and gold in the region.

The work is being conducted under a March 2025 agreement where KoBold can earn a 75% interest in non-gold/silver discoveries by spending USD$12 million over five years. Aurion retains full rights to any gold or silver discoveries and continues its own exploration, with drilling ongoing at the Vanha prospect.



Key Highlights

- KoBold Metals has commenced exploration on a ~35 km² portion of Aurion's wholly-owned Risti property in Finland.
- The program consists of extensive base of till and bedrock chip sampling, a key method used in major regional discoveries.
- Under the agreement, KoBold can earn a 75% interest in critical mineral discoveries by spending USD$12 million over five years.
- Aurion retains 100% of any gold or silver discoveries and is currently drilling at its Vanha prospect on another part of the property.

"We are excited to commence the exploration activities with KoBold's highly knowledgeable and innovative team. The extensive sampling program will generate valuable data for gold and critical minerals exploration and utilizes a key method applied in the discovery process of all significant deposits in the region..."– Matti Talikka, CEO, Aurion Resources
